IV. Discussion Item

1. Discussion and Review of Petition Submitted by Michael Kostrewa regarding music levels at VFW Pool.

Marty Kosobucki, Director of Parks, Recreation, and Forestry explained that on the weekend of August 12th and 13th there was a loud music complaint at the VFW pool. The police were contacted by Mr. Kostrewa, regarding the music and the officer requested pool staff to turn the music down. The following Monday morning the problem was addressed. As a temporary fix for the final week of the season, pool staff was instructed to keep the music turned down during the day and off during the evening hours. Marty stated that Trista Groth, the City Sanitarian, was contacted to test the noise level coming from the pool. From these tests, it was determined that the noise level did not exceed city limits. However, from outside the pool fence, the music could not be heard, but on Reid Street the music could be clearly heard, but again it did not exceed the noise limits. Chelsea Moberg, Recreation Supervisor, also reached out to UWGB Professors for their expertise. The comments received were that there is some type of reverberation happening at the facility. Staff feels that music is a very important part of the facility and if the issue cannot be resolved with the location and direction of the speakers, then further consultation is needed. Mr. Kostrewa was not present at the meeting for comments.

Alderperson Chandik Kundinger moved to open the meeting to public comments at 6:42 pm, seconded by Ryan Jennings. Upon vote, the motion passed unanimously.

Joe Nicks commented that in 2015 when the city updated the noise ordinance, the levels were set so high that they are almost unenforceable. Because of complaints, in March of 2022 the city hired a noise consultant, and the report was presented to finance in August and October of 2022. In April 2023 the topic was sent to council, and it was referred back to staff. To date the topic has not been brought back to council. Mr. Nicks feels that there needs to be a workable noise ordinance in effect that will work for all residents, and the consultant that did the previous noise study should be contacted. Alderperson Raasch commented that he disagreed with some of Mr. Nick's comments about the updated noise ordinance.

James Kneiszel moved to return to regular order at 6:50 pm, seconded by Alderperson Defnet Ledvina. Upon vote, the motion passed unanimously.

James Kneiszel questioned if anything changed with the volume of the music and if there were any other complaints received during the season. Marty Kosobucki explained that

he is not aware of any changes in the volume. The amplifier system has a line on it and staff is aware that the music is not to be turned above the line. Marty also commented that Mr. Kostrewa said that he has made many complaints. Neither Marty nor Chelsea have received any complaints but cannot say if the pool managers have received any. However, the pool managers do a very good job at relaying complaints and concerns to the Recreation Supervisor.

Ryan Jennings stated he thinks it would be a good idea to start by looking at the direction and location of the speakers.

Randy Soquet commented staff should investigate the problem and bring it back to park board if complaints are received next year.

RESULT: DISCUSSED

2. Discussion regarding removal of Community Garden at Lions Trailside Park due to condition.

Marty Kosobucki, Director of Parks, Recreation, and Forestry stated that this item was requested to be placed on the agenda by Alderperson Hansen, because he received a couple of complaints regarding the condition of the community garden and the surrounding areas.

Melissa Thiel Collar moved to open the meeting to public comment at 6:55 pm, seconded by Alderperson Chandik Kundinger. Upon vote, the motion passed unanimously.

Marty Kosobucki stated that Alderperson Hansen supplied some photos of the condition of the gardens, and these photos are those that were given to the park board members tonight.

Bob Wildgrube, Secretary of the Killarny Trail Condo Association, spoke representing the association. Mr. Wildgrube stated that the park and community garden are not up to the standards of other parks, and adequate park maintenance is not done. When the community garden was to be placed at Lions Trailside Park, the condo association was not contacted or made aware of this. With the garden located at the park, there are very few people that use the park now. Local property owners are concerned that the garden will have a negative effect on the value of the homes. There are weeds flourishing in the garden and many of the plots are abandoned. The condo association would like the park maintained, filled with playground equipment and picnic tables, and for the garden to be moved to a different location so the park can be used as a park, not a garden.

Rachel Quintas, Brown County Extension Community Garden Coordinator stated she recently received the garden coordinator position. The previous coordinator left in July, so the position was open for the end of the season, which is not the prettiest time for the gardens. Being new to the position, she is not aware of any other complaints, only this one that was received recently. Rachel explained that there was a little less engagement with gardeners in their plots this year, because of the air quality issues; the severe heat warnings as many of the gardeners have health issues; the lack of rain; and the water supply at the park was not filled often enough. There have also been gardeners that have abandoned their plots during the year, so staff plans to provide some educational courses at the beginning of the season for the gardeners. Rachel explained that there is a contract

that is signed by all gardeners that does limit the height of the weeds and what needs to be done by them. Being new to the position, Rachel plans to enforce consequences on the gardeners if they are not following the rules of the contract and implement forfeiture notices for those breaking the rules because there is a long waiting list. Rachel explained that community gardens help with food insecurities and many gardeners donate produce to food pantries. 70% of the gardeners are low to moderate income and the gardens allow individuals to grow culturally appropriate produce. The community gardens are produce gardens, so they do not have large, beautiful flowers, however staff is looking into ways to make the garden look more appealing to surrounding residents.

Ryan Jennings questioned if the wait list is specifically for the Lions Trailside Garden. Rachel was not certain if Lions Trailside had any people on the wait list specifically requesting the park, but some would be able to travel to the location.

Alderperson Defnet Ledvina questioned how long the garden has been at Lions Trailside Park. Marty Kosobucki stated that it has been there for 4 years.

Randy Soquet questioned the number of people gardening at Lions Trailside Park and what is the nearest location to Lions Park. Rachel explained that she thought the number of plots was around 25 and the Lions Trailside location is the only location in De Pere.

Wayne Endries, President of the Killarny Trail Condo Association stated that he is behind the gardens, however, the association feels the garden is in the wrong location. The garden does not belong in the middle of a park. Parks should be used for kids running around and for picnics. The weeds in the gardens are getting higher every year. The gardeners do get a lot of produce and enjoyment out of gardening. Home values decreasing because of the garden is a concern. The association would like to see the park used as it should be, and a garden in the middle of the park is not the answer.

Kristina Renier stated she has been gardening since 2015 and the great thing about community gardens is that they are organic, and no chemicals are used. Kristina stated that the park's mission statement includes cultivating communities, providing recreation, and nourishing neighborhoods, which community gardens do. She stated that studies show that community gardens increase property values and reduce crime in the area. They allow parents to show kids how to grow their own food and allow people who cannot afford the high grocery store prices the ability to grow their own organic produce. Kristina is for keeping the garden at Lions Trailside Park.

Mike Stumpf, representing the De Pere Lions Club stated their last meeting was on Thursday of the previous week, and they found out about the complaints on Friday. Due to timing, the Lions Club has not had the opportunity to discuss this issue. Mike explained that the community gardens represent the De Pere Lions Club mission to address hunger and diabetes in the area. The Lions Club has a significant investment in the park, and he hopes that they can be part of the decision-making process regarding the community garden.

Jessica Burdsall stated that she gardens at Lion's Trailside with her mother-in-law, who lives by herself. The garden gives her a reason to get out of the house and socialize with people. This community garden plot helped her mother-in-law out so much, they decided to get an additional plot. These two garden plots allowed them to spend the entire

summer in the garden together as a family, and share food with pantries, co-workers, neighbors, and friends. This time and conversation that the community garden provides cannot be replaced.

John Nehring wants the city to keep the garden at Lions Trailside Park so their family can continue canning, which allows them to eat fresh vegetables throughout the year.

Lori Sadewaner stated she is not a gardener but is married to one. She feels that there are different opinions on what a park should look like between individuals. Gardeners are very protective of their plots because of the hard work they put into them to make the soil better each year. She commented that the weeds in the empty lots near the condos are far higher than the weeds in the garden, and these weeds cause a problem for the gardeners.

Kristi Kerscher stated her kids love the garden. Her family lives in an apartment, so the garden is a way for her kids to run, play in the sand, as well as provide fresh produce for the family. The gardens have been a wonderful process for her family and provide a great education, not only for the kids but the gardeners learn from each other too. When the Brown County Extension received the complaint, they immediately sent out an email to the gardeners for suggestions. The gardeners found time to do a community garden clean-up for the gardeners that did not keep up their plots and couldn't get out there. The gardeners will do anything for each other and anything to keep the garden.

Eben Erhard, member of the De Pere Beautification Committee, and a volunteer coordinator gardener for the NEW Master Gardeners. Eben stated that if you look up the definition of a municipal park, it is to provide recreation to citizens, and this is what Lions Trailside Park, and the garden does. Eben has been gardening at Lions Trailside Park since the beginning and has donated over 200 pounds of food every year to pantries, senior citizen residences, and touring musicians. All gardens have weeds, but there are also invasive species located in the park property. The gardeners are passionate about keeping the garden where it is. At the beginning, the soil was not great and did not drain properly. There has been organic matter and a lot of time put into the gardens to help with the soil conditions. Gardens cannot be simply moved to a different location. Everyone has neighbors or things that we do not like. Think about living next to Legion Park, with the pool, ball diamond, the Pink Flamingo tournament, disc golf, and the annoying sound of pickleball. Eben asked the park board to side with the many and keep the park and the garden where it is. Eben provided a letter to the park board from Amy Murphy, De Pere Christian Outreach Food Pantry in support of the garden.

Cheryl Williams, member of Friends of Community Gardens, stated community gardens have lost some of their federal funding so a group got together to start Friends of Community Gardens. This group is working on securing long-term endowments and developing alternative funding for community gardens. The Green Bay Community Foundation controls the funding for the program, which has secured a levy from Brown County and many great donations. Studies have been done, which show that the gardens tend to support low income and immigrant populations and are also considered the best integrated public place. The study also provided proof that areas around community gardens show reduced crime, and many people choose to live near community gardens.

Ryan Jennings moved to close the meeting at 8:00 pm, seconded by Melissa Thiel Collar. Upon vote, the motion passed unanimously.

James Kneiszel stated that he appreciates the turnout for the meeting tonight. Prior to the meeting he went out to Lions Trailside Park to view the garden and it looks like a garden. There were a couple of plots that appeared to be out of control, but one thing he noticed was a sign next to a garden plot that invited people to try their tomatoes. The park property is for public use, not condo property, and the garden takes up a small percentage of the property. The community gardens provide a really nice service to the community and if there is a waiting list to get a garden plot, maybe the city could do more.

Ryan Jennings stated he works in the health and fitness field. Ryan suggested expanding the garden to allow for a flowers border and for additional plots.

Alderperson Defnet Ledvina agreed that this could be a learning opportunity for the neighbors about the garden. Alderperson Ledvina stated she had no idea how popular the garden is and would love to see the park system expand on this. There are a lot of existing parks that have a lot of green space that could be used.

Alderperson Chandik Kundinger also agreed with everyone and stated that sometimes negative comments can spur positive outcomes. She appreciated everyone hearing each other out and it was inspiring to hear both the concerns and the support.

Conner Mason, Teen Advisor, stated that at 14 it is hard to relate to all the citizens here, but it was interesting to see how community oriented the gardeners are. The comments shed light on how the community gardens are a good thing. Conner does agree that some maintenance needs to be done and this would provide a great opportunity for the community to have new experiences with diverse individuals.

Melissa Thiel Collar stated she grew up around gardening and understands the problem with weeds but is also aware of the food insecurities for kids that do not get fresh produce. She understands the concerns of the condo association, however with the circumstances this year there is a reason for the lack of upkeep. Melissa feels that the garden should be observed closer next year to see if the problems still exist.

Randy Soquet thanked all the people who devoted time tonight to come to the meeting and the ability to be open with each other with differing opinions. Randy also stated that he is looking forward to working with Rachel Quintas with the Brown County Extension office and what changes will be made to make things better in 2024.

Marty Kosobucki stated that the item was just for discussion, so no action can be taken at this time. If the park board would like an action item on the community garden it will need to be on a future agenda.

Alderperson Chandik Kundinger requested an annual update of the community garden in 2024.

3. Continued Discussion on ordinance related to dogs in De Pere Parks.

Marty Kosobucki, Director of Parks, Recreation, and Forestry stated that overall, the information received in the survey for the COMP plan leans toward allowing dogs in the

parks in some capacity. If the Park Board is interested in changing the ordinance, staff will work with the legal office to revise the current ordinance.

Randy Soquet stated he would like to see an update to the ordinance to allow dogs in parks.

James Kneiszel commented that in the survey, there was a lot of reference to dog poop in the parks and wondered if there is a large problem with this currently. Don Melichar, Park Superintendent and City Forester stated that there are not a lot of problems, but staff does encounter areas where people allow their dogs to run freely throughout the park. Optimist Park is the worst of all the parks.

Melissa Thiel Collar commented that the city attorney should be asked about the city liability and what the enforcement and repercussions are going to be for offenders. Marty Kosobucki stated that currently there is a citation that can be issued to individuals not following the ordinance, however this isn't used very often.

Randy Soquet moved to open the meeting to public comments at 8:21 pm, seconded by James Kneiszel. Upon vote, the motion passed unanimously.

Mike Stumpf stated he was part of the group that did the fundraising for the dog park. As a former dog owner, he is in favor of allowing dogs in parks, however, he does feel that dog owners need to be held responsible for their pets. If a pet owner is found violating the ordinance, he feels that the fines should be substantial.

James Kneiszel moved to close the meeting to public comment at 8:23 pm, seconded by Alderperson Defnet Ledvina. Upon vote, the motion passed unanimously.

V. Staff Updates

1. Staff Update on Playground Installations at Kelly Danen, Legion and Lawton Parks.

   Marty Kosobucki gave an update on the three new playgrounds. The playground at Kelly Danen has been installed and waiting on the poured in place surfacing to be installed. The poured in place contracts have been approved, staff is just waiting for them to be returned. Legion Park playground is scheduled to be installed on Monday, September 25th, with the poured in place surfacing to be scheduled once the contracts are returned. Lawton Playground is scheduled to be installed on Wednesday, September 27th. This playground will be getting wood chips, so these will be placed once the playground is installed.

RESULT:	**DISCUSSED**

2. Staff Update on Nelson Family Pavilion Ground Breaking.

   Marty Kosobucki, Director of Parks, Recreation, and Forestry stated that the groundbreaking ceremony for the Nelson Family Pavilion is scheduled for Friday, September 29th at 10:30 am. The weather is supposed to be 74 degrees and sunny.

RESULT:	**DISCUSSED**

3. Staff Update on repair of Southwest Park Shelter.

Marty Kosobucki, Director of Parks, Recreation, and Forestry stated that staff met with the consultant today, and they are wrapping up the scope and specifications for the project. Staff will contact the insurance company tomorrow to get confirmation of the project. Once confirmation from the insurance company is received then staff can get the project proposals out.

RESULT:	**DISCUSSED**

4. Staff Update on Comprehensive Plan Status.

Marty Kosobucki, Director of Parks, Recreation, and Forestry stated that the draft plan of the Comprehensive Outdoor Plan was submitted to staff this evening. Staff plans to bring the draft copy of the COMP plan to the October meeting.

RESULT:	**DISCUSSED**

5. Staff Update on Major Projects.

Marty Kosobucki, Director of Parks, Recreation, and Forestry explained that the attached report is an update of the park projects that have been completed, along with the ones that are still being worked on.

RESULT:	**DISCUSSED**

VI. Future Agenda Items

Connor Mason, Teen Advisor question the chart on page 28 of the survey for the COMP Plan. In the survey, there was slight interest in a skate park or BMX track, which was the least picked option. Connor questioned if there is a way to see what the demographics of the survey are. There are not a lot of amenities for teens to do at the parks, other than the sport fields, and feels that a skate park or BMX track would be a great addition to city parks.

Alderperson Chandik Kundinger questioned what can be done to get the younger demographics interested in completing the survey and providing input.

VII. Adjournment

Alderperson Defnet Ledvina moved to adjourn the meeting at 8:27 pm, seconded by James Kneiszel. Upon vote, the motion passed unanimously.

Respectfully submitted,

RE: Pink Flamingo diamond proposal

The Pink Flamingo have reached out to the City to propose a joint effort in improving the Legion Softball Field. They are proposing an extension to the outfield fence that would raise it 3 ft. The purpose of this is to reduce the amount of home runs that occur, and provide advertising space without hindering spectator views.

The outfield fence at Legion Ball Field is relatively short with Left Field being 240 ft, Center Field 235 ft and Right Field 250 ft in length. Even though the current fence stands at approximately 7 ft, the field is still short for softball standards, especially when you consider the advancement in technology of softball equipment.

We have received a quote from Fortress Fence in the amount of $16,970 to provide a 3ft stub on top of the current posts and replace with 10ft fabric. Pink Flamingo has offered to donate $8,000 toward this project/improvement.

While we do not have money allocated for this project, or proposed in the 2024 Budget, an option to consider is using the left over money from the Legion Softball Renovation project that was funded from ARPA money. The budget for the Legion Renovation project was $75,000 and we will have at least $10,000 left after all repairs have been completed.

Staff Recommendation: Accept proposal from Pink Flamingo.

Lion's Park Community Garden Report

Total number of beds in Lion's Garden: 25 Beds

Total number of gardeners in Lion's Garden: 25 Gardeners and their families

Waitlist for Lion's Garden: 8 individuals and their families

Summary of growing season:

Excerpt from Site Leader Kristina Reignier

"Despite a challenging growing season in 2023 where we had high temperatures, dangerous ozone levels, and severe lack of rain, the Lions Community Garden flourished. There was more gardener "traffic" this year than any time in the last 4 years of the garden's existence. Gardeners traded tips and recipes with one another.

Tomatoes, cabbages, pumpkins, sunflowers, beans, zucchini, and peppers thrived. The soil composition has finally reached the point where it is optimal for gardening.
Due to weather conditions, the water tank needed to be filled more frequently than was done in the past. Communication between the gardeners/ coordinator/ Park Board could have been better in this regard as the water tank emptied a few times and it took a while for it to be refilled. It should be noted that early on, nearby kids or errant gardeners left the water running a few times, depleting the amount of water in the tank.

An added compost pile was a welcome change. However, it was too small and quickly overflowed within a short period of time. In the future, a volunteer force to regularly haul away the compost to the nearby facility should be established.

Straw was added to the walkways at the beginning of the season. This was meant to make it easier to walk and soak up extra moisture and mud. It did this but unfortunately, it seemed to sow grass which in some portions of the pathway became unruly throughout the summer and made it difficult for gardeners to get to their gardens. Communication could be better, especially for first-time gardeners to let them know that they are responsible for maintaining the perimeters of their gardens, as well as the plots themselves.

Weeds are a big issue in the garden and are very difficult to keep at bay. We had some gardeners who fell behind in their weeding maintenance and simply were never able to take control of it. This led to neighboring residents complaining about the weeds. Crab grass, wild radishes, and wild tomatillos grow rampantly. Perhaps more education about weed control would be helpful."
-Kristina Reignier

Community Garden Coordinator plans for change:

- Strengthen communication between site leader/myself/De Pere Park Superintendent for consistent water refills -> having efficient water refills allows the gardeners to properly tend to their gardens and the maintenance
- Compost System will be re-created; required gardener participation of tending to the compost system. Mandatory rotation of hauling away/spreading the compost
- Cardboard will be laid down in pathways instead of straw
- Educational meetings at the beginning of the season for new, and interested returning, gardeners
    - These meetings will serve as a time to share information about the requirements of garden maintenance and trouble-shooting weed issues, proper watering, required compost system work, and mandatory community garden tasks

RE: Preserve Trail Relocation

The WDOT is asking for support and approval of relocating the Preserve Trail as it comes into Southbridge Road. With the Southbridge corridor renovation going on, restructuring of the trail is necessary to have it appropriately blend in with the revised road project. I have included a map provided from the WDOT that A) explains where the trail currently is, and B) where the trail is supposed to go in relation to the planned road project.

One item that you should be made aware of is with the relocation of the trail comes the proposed acquisition of a small piece of private property. This property acquisition is needed for the trail relocation and will be completed through the WDOT project. The land will then be turned over to the City.

Staff recommends the WDOT proposed relocation of the Preserve Trail.

RE: James Street Dock Extension

I am asking the Park Board to consider eliminating the James Street Dock extension from consideration and replacing it with the hiring of a consultant to develop a marina style plan.

For a number of years, we have included the extension of James Street Docks within our Capital Improvement Plan, and in 2022 we received funding to extend the marina. The project was approved for $40,000 with $25,000 expected to come from grant funding. Shortly into 2022, we were notified by the WDNR that our docks at James Street (RiverTyme) and Bomier were not in compliance with their rules. (Docks cannot encapsulate any water.) Upon learning of this, we reviewed the original proposal for extending the James Street Dock and realized this would cause the same issue. So, the original plan for the James Street Dock extension is something we cannot do under the guidelines/rules of the WDNR. While the project's intent is still valid, I believe we should redirect our efforts to hiring a consultant to design a marina concept that would comply with the WDNR requirements. It is very possible the $15,000 the City was allocating to the project could cover the cost of the design.

RE: Service Analysis

As part of our Comprehensive Plan update we also wanted an outside opinion on select services we offer, the community view of their importance, and how these services compare financially to the private sector.

I have read the document and formulated some ideas and opinions, however I will defer on providing any commentary or suggestions at this time until you have had the chance to review and develop you own opinion. I look forward to your opinion on the report and discussion with what to do with the information.

City of De Pere Parks, Recreation, and Forestry Operations Evaluation

Introduction

The following evaluation delves into the operations of the City of De Pere Parks and Forestry in detail, with the following objectives:

1. Identifying core services provided.

2. Evaluating public perception and preferences regarding Parks and Forestry core services.

3. Conducting a peer evaluation of communities in the region and analyzing national metrics related to the provision of these core services.

4. Assessing the core services of the regional Private Sector Parks, Recreation, and Forestry Department.

Parks, Recreation, and Forestry Department Core services

The City of De Pere Parks, Recreation, and Forestry Department provides a range of services for the city, categorized into Parks and Streets Maintenance, Urban Forest Maintenance, Community Event Support, and Community Beautification and Education. **Table 1** displays the core services offered, along with the staff responsible for performing the work.

Parks, Recreation, and Forestry Department Staffing

Table 2 presents a breakdown of the full-time equivalent (FTE) staffing for the City of De Pere Parks, Recreation, and Forestry Department. Staffing experiences a seasonal peak beginning in spring and ending in fall. These staffing numbers represent the budgeted hours in the 2023 City of De Pere Budget.

Findings from Public Survey

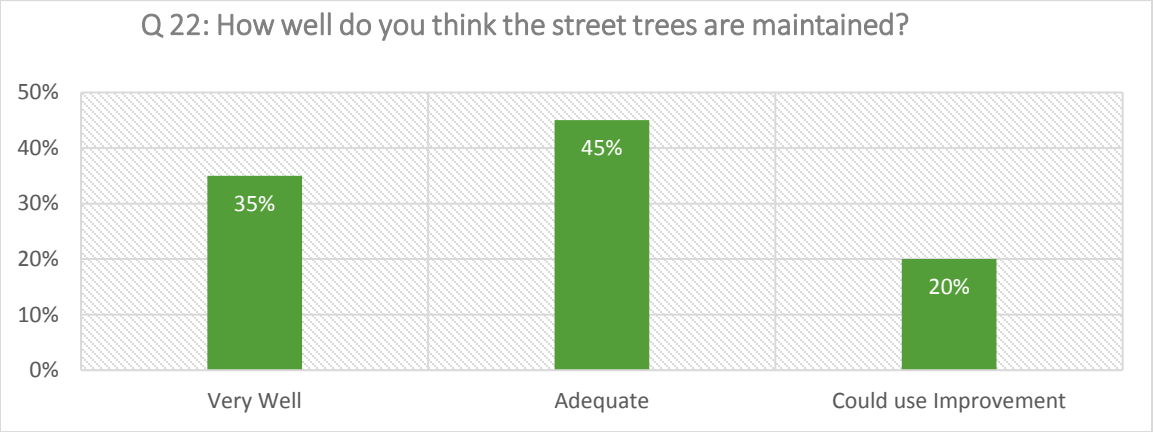

In Community Survey, the City included questions about public perception and satisfaction with Parks and Forestry core services. This section presents the results of that survey.

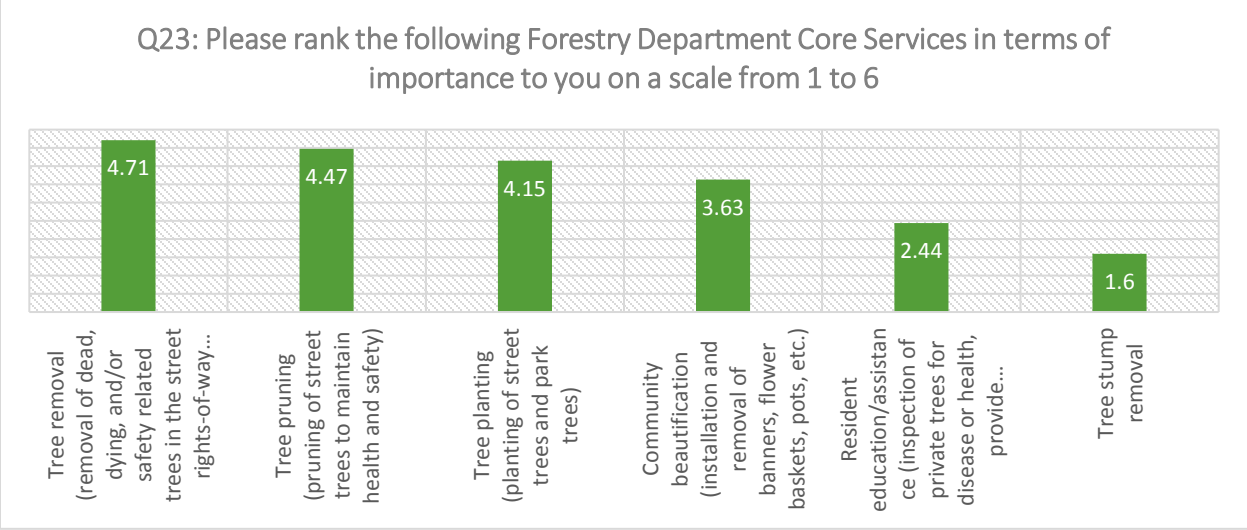

Questions 20 and 21 indicate a significant consensus regarding the importance of street trees in neighborhoods. In total, 96% of respondents expressed a preference for neighborhoods with street trees, and 81% expressed a desire to see more street trees.

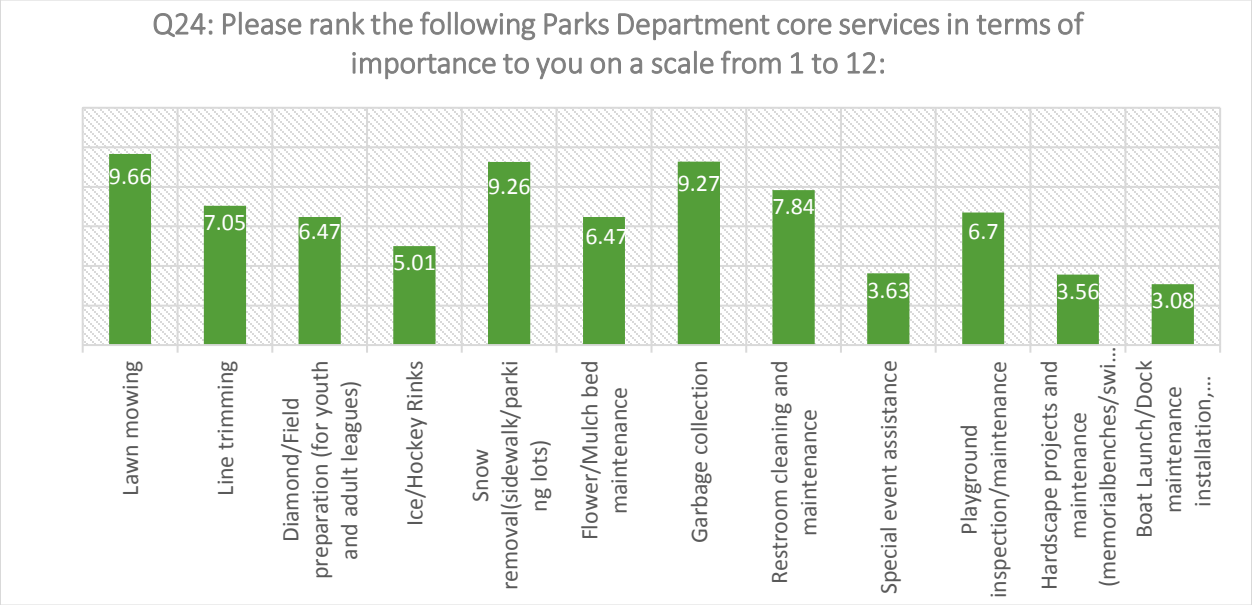

A total of 80% of respondents expressed satisfaction with the maintenance of street trees by the Parks, Recreation, and Forestry department, indicating their contentment with the City's urban forest management.

When respondents were asked to rank the Forestry Department's core services, their responses identified Tree Removal as the most important, followed by Tree Pruning in second place, and Tree Planting in third. This question highlights that the primary services were considered the most crucial, while the support services were rated lower in importance.

When respondents were asked to rank the Parks Department's core services, their responses indicated that lawn mowing, snow removal, and garbage collection were considered the most important. In the second tier of responses, respondents placed restroom cleaning and maintenance, playground inspection/maintenance, and line trimming. This question underscores that maintenance-related services for parks were deemed the most important by respondents.

Comparison To NRPA Benchmarks

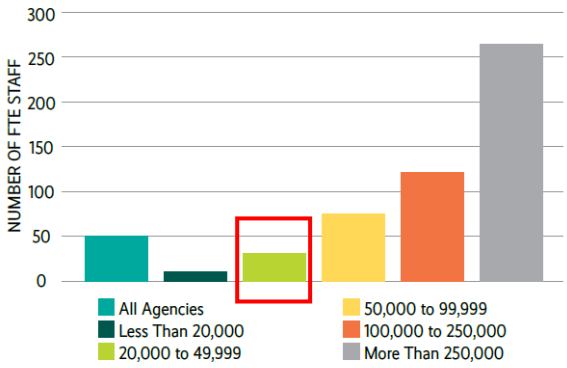

To evaluate the City's staffing for Parks, Recreation, and Forestry, two methodologies were used. The first uses National Recreation Parks Association (NRPA) benchmark data to determine if the level of staffing is below, average, or above the City's peers.

NRPA Benchmark

The NRPA Benchmark results are obtained by surveying communities of all sizes to establish median, lower quartile, and upper quartile values for various evaluation metrics. The City of De Pere falls within the population category of cities with 20,000 to 49,999 residents.

The City of De Pere's 2023 budget indicates that total staffing expenditures for Culture, Education, and

Figure 1 – 2023 NRPA Agency Benchmark, figure 10 showing the breakdown of staffing for parks and recreation agencies by jurisdiction population.

Recreation amount to 15.0 Full-Time Equivalents (FTEs). **Table 2** above provides a breakdown by category. It's important to note that due to the variability in organizational structures and services within parks and recreation agencies, direct comparisons between agencies can be challenging. Nevertheless, overall staffing numbers can offer some context, and they typically lean towards parks and facility maintenance personnel.

The 15.0 FTEs encompass staffing for various functions, including the community center, parks and recreation, forestry, boat ramps, parks equipment/vehicle maintenance, recreation programs, events/celebrations, and swimming pools.

According to the 2023 NRPA Agency Review, the median Full-Time Equivalent (FTE) staffing for a Park, Recreation, and Forestry department is 32.3 FTEs. The lower quartile is 17.0 FTEs, and the upper quartile is 67.8 FTEs. This places the City of De Pere in the lowest quartile for staffing when compared to nationwide statistics.

It is important to consider that the number of Full-Time Equivalents (FTEs) is significantly influenced by three key factors:

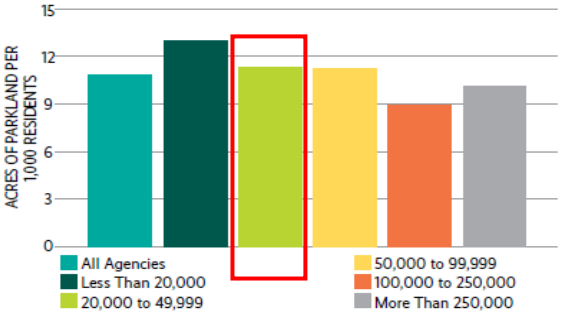

1. *The Number of Acres of Parks and Open Spaces Maintained:*

The City of De Pere is responsible for maintaining over 485 acres of parks, open spaces, and special use areas, which equates to 19.1 parks per 1,000 residents. As shown in **Figure 2**, according to the NRPA benchmark, the City of De Pere falls within the upper quartile of park acreage maintained among communities of comparable size.

2. *Operating Expenditure:*

In the 2023 City of De Pere operating budget for Culture, Education, and Recreation, a total of $2,985,948 has been allocated. This represents a notable 10% increase from the previous year (2022). When compared to its peers in the 2023 NRPA benchmark, the City falls just below the median expenditure of $3,255,771.

Median	$5,500,000	$1,200,000	$3,255,771	$8,005,757	$11,834,432	$28,878,054
Lower Quartile	$2,045,100	$573,150	$1,996,538	$5,338,200	$6,147,332	$14,735,128
Upper Quartile	$14,841,451	$2,482,403	$6,279,749	$13,413,924	$21,753,741	$53,898,865

Figure3 – 2023 NRPA Agency Benchmark, figure 13 showing the breakdown operating expenditures by jurisdiction population.

When comparing operating expenditure to the per acre of Park and Non-Park sites within the park system, the City allocates approximately $6,700 per acre of park annually. In reference to the 2023 NRPA benchmark, this figure falls roughly midway between the lower quartile ($4,250) and the median quartile ($8,106) expenditures.

3. Population Density.

The City of De Pere encompasses approximately 12.8 square miles and is home to a population of 25,361, as reported by the 2022 American Community Survey Estimate. This translates to a population density of around 2,000 residents per square mile. Generally, higher population density correlates with higher expenditures per acre of parkland.

According to the 2023 NRPA Benchmark, agencies serving populations of 500 persons per acre allocate approximately $4,359 per acre of parkland, while those in denser areas with 2,500 residents per square mile spend $13,048 per acre. In contrast, the City spends approximately $8,106 per acre of parkland, falling closer to the higher-density category.

In summary, the 2023 NRPA Benchmark reveals that the City employs significantly fewer Full-Time Equivalents (FTEs) than its peers, with operating expenditures just below the median. Despite this, the City manages a parks system with acreage in the upper quartile in comparison with its peers.

It is also important to note that the scope of services provided by Parks, Recreation, and Forestry departments can vary, but traditionally, street tree maintenance is the responsibility of streets or public works departments. Notably, the City manages a much larger acreage and urban forest than what would typically fall under the purview of a parks department, even though its overall expenditure and staffing levels are lower.

Evaluation of Private Sector

To assess the availability of private firms capable of performing the core services provided by the City's Parks, Recreation, and Forestry Department, an inventory of landscape contractors, nurseries, and facility maintenance firms within the greater Green Bay Area was produced. Subsequently, these firms were contacted to inquire about the services they offer and to obtain approximate hourly cost ranges for their services. Out of the 20 firms contacted, 8 responded.

The data was then compared with the services provided by the City of De Pere's Parks, Recreation, and Forestry Department. **Table 3** presents an evaluation matrix that breaks down the services provided, along with the approximate hourly rates for each private contractor and the City. The evaluation found that by in large a single private contractor does not provide all the services currently provided by the City's Parks, Recreation, and Forestry Department, particularly those that fall under the category of parks maintenance.

When evaluating the hourly cost of providing those services available in the private sector, the private sector ranged from $60 to $135. The City of De Pere comparatively provides these services for the hourly cost of $38 to $45 an hour. This includes the base pay rate of $24 to $31 per hour and an estimate of $14 of hour for benefits. The benefits/ rate equivalent was estimated by reviewing 2023 Parks Department staff expenditure for FICA, Retirement, Health, Dental, DIB, Life and Workman's Comp items and determining the median value on an hourly basis (presumes 2,080 work hours in a year).

Discussion of Findings

The comprehensive evaluation of the City of De Pere's Parks and Forestry Operations has yielded several noteworthy findings. The evaluation is guided by several key objectives.

Firstly, it seeks to identify and define the core services offered by the department. Secondly, the evaluation aims to assess public perception and preferences regarding these core services, recognizing the importance of aligning services with community needs and desires. Additionally, the assessment includes a comparative analysis of peer communities within the region and utilizes national metrics to benchmark the provision of these essential services, ensuring a contextual understanding of performance. Lastly, the evaluation encompasses an examination of the regional private sector's role in delivering comparable services, providing insights into potential alternatives and cost-effectiveness.

The City of De Pere's Parks, Recreation, and Forestry department provides a diverse spectrum of municipal services, with a pronounced focus on the upkeep of its urban forest and parks, both of which have garnered favorable assessments from respondents in the community survey. The survey also highlighted the significance of Parks and the Urban Forest to the City’s residents, with core services related to their maintenance being recognized as top priorities.

In providing these services, it is worth noting that the Parks, Recreation, and Forestry department falls within the lower quartile concerning its full-time equivalent (FTE) staffing when compared to the National Recreation and Park Association (NRPA) benchmark for municipalities within the 20,000 to 49,999 population range.

Despite this, the department manages its operations with an operating budget positioned just below the median budget for communities within the same population range. This is achieved while overseeing and maintaining a significant acreage of parks and recreation areas (485 acres), placing it within the upper quartile among municipalities of similar size. Additionally, the department maintains additional public lands consisting of the urban forest and public right of way (mowing).

An evaluation of private sector alternatives for core services reveals a notable gap in availability for many of these services, indicating likely difficulty in relying on the private sector to provide core services. Furthermore, when assessing the cost-efficiency of these core services offered in comparison to private sector counterparts, the City proves to be lower cost on a hourly basis.

RE: Comp Plan - Draft

Enclosed you will find a copy of the proposed draft plan for our Comprehensive Outdoor Recreation Plan. This draft plan was put together with input from staff, community input and previous or current plans throughout the City.

The main body of the plan explains and reviews parks, location, inventory, service radius, etc… The Appendix covers each park and recommendations for improvement.

I would ask the Park Board to review the plan and provide insight and recommendations for changes, additions, deletions, etc…

Mission Statement

The City of De Pere seeks to enrich the quality of life of residents and visitors of all ages and abilities through preserving, developing, operating, and maintaining parks, open space, facilities, and recreation services.

SUMMARY

The City of De Pere is dedicated to providing and maintaining quality parks, facilities, and recreational programs for both residents and visitors, as these provide environmental, health, economic and social benefits to the community.

To ensure effective management and development, the City of De Pere follows a 5-Year Comprehensive Outdoor Recreation Plan. The City's Comprehensive Outdoor Recreation Plan 2024–2029 provides an analysis of the existing park system and creates a vision for the future. The adopted plan does the following:

- Establishes goals and objectives for the development of the park plan.
- Analyzes population projections.
- Provides an inventory and analysis of existing parks.
- Evaluates the level of service provided by the existing parks.
- Interviews Park users and stakeholders to identify needs.
- Provides a needs assessment and recommendations for park improvements and future parks.
- Provides general cost estimates and prioritizes park recommendations.
- Identifies funding sources to offset the cost of maintaining and improving the park system.

The recommendations in the Comprehensive Outdoor Recreation Plan 2024–2029 is annually reviewed when updating the City's 7-year Capital Improvement Plan, which includes recommendations for park maintenance and improvements.

By periodically updating and adopting a Comprehensive Outdoor Recreation Plan, the City of De Pere maintains its eligibility for funding opportunities through state and federal grant programs.

INTRODUCTION

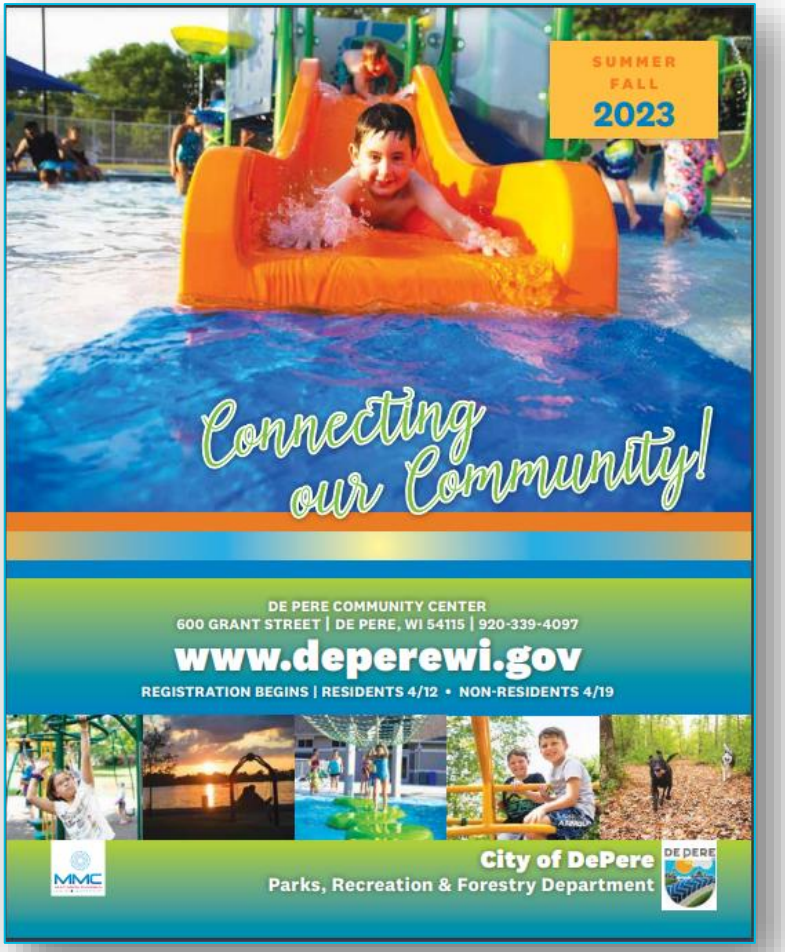

The City of De Pere provides a wide range of park and recreation options, benefiting residents and visitors with environmental, health, economic, and social advantages that enhance their quality of life. Access to these facilities has become a crucial factor for individuals when deciding where to work, live, raise a family, or retire. Additionally, employers are increasingly drawn to communities with such amenities, as it helps them attract talent from neighboring areas within the region or country.

The City of De Pere provides parks in each category (Community, Neighborhood, Minipark) that serve day to day recreation as well as special event uses such as farmers markets and community wide celebrations. This ensures that the City's Parks and Recreation system meets the expectations of both present and future residents, as well as visitors.

The City of De Pere maintains a 5-Year Comprehensive Outdoor Recreation Plan to act as a guide for acquiring and developing public outdoor parks and recreation facilities and to ensure that its plan meets requirements established in Chapter NR 50 of the Wisconsin Administrative Code. This allows De Pere to participate in state and federal funding programs that may be used to offset the cost of park expenditures.

PARKS AND RECREATION SEASONAL PROGRAM

The City of De Pere Comprehensive Outdoor Recreation Plan provides an inventory of existing parks and facilities, analyzes park and recreations needs, and recommends action steps that will help De Pere meet the needs of the community.

GOALS AND OBJECTIVES

Goals and objectives provide guidance and direction for the development of the Comprehensive Outdoor Recreation Plan.

- Goals are statements of desired outcomes or achievements. They are general in nature.
- Objectives are more specific and are measurable.

Recommendations to implement the Plan should be consistent with the goals and objectives in this section.

1 Land Acquisition

Goal: Maintain an adequate amount of active and passive recreational lands to meet current and future recreational needs.

a. Acquire additional lands for passive park use based on the current and projected demand, as well as considering their environmental significance. These guidelines are outlined in the Recommendations section of the City's Comprehensive Outdoor Recreation Plan.

b. Acquire suitable and developable land in recommended areas for future park development, specifically for active recreation facilities.

c. Identify and pursue grants that offer funding opportunities for parkland acquisition.

d. Evaluate the City's municipal code regarding Public Sites and Open Space requirements to ensure they adequately provides for public land or fees in lieu, making certain that provisions are effectively in meeting the needs of the community.

2 Park Maintenance and Development

Goal: Provide adequate and easily accessible facilities at all City parks based on their designated use and type (i.e., neighborhood vs. community park facilities).

a. Update and maintain all existing park facilities to guarantee their safe and efficient use by visitors.

b. Develop and approve a site-specific master plan promptly after designating or acquiring parkland. This plan should outline the specific details and features of the park facilities.

c. Initiate the development of park facilities when the residential area surrounding the proposed park begins to be developed. This ensures that the park's amenities coincide with the growth and needs of the nearby population.

d. Develop Park facilities in alignment with the population's growth and requirements in the vicinity of the park. This approach ensures that the park can adequately serve the evolving needs of the community.

3 Shared Services

Goal: Coordinate shared use or cooperative agreements with local and regional entities to use resources efficiently and effectively.

a. Collaborate with the School District, County, and private recreation associations to improve and expand recreation opportunities and economic benefits throughout the community in a cost-effective manner.

b. Establish formal agreements among the City, School Districts, and public/private recreation associations for use, revenue, and maintenance, ensuring efficient operation of public recreation facilities.

c. Support cooperative agreements with non-profit organizations or external entities to promote, manage, and enhance park and recreation offerings.

4 Park Development

Goal: Promote the benefits of larger neighborhood and community parks, which provide a wide range of facilities and uses.

a. Analyze the location, size, and function of existing and proposed parks during annexations or when zoning changes occur.

b. Identify the optimal location for future park sites to best serve community-wide needs.

c. Identify residential districts that are deficient in neighborhood parks and consider acquiring land for parks in these areas. In developed areas of the city, consider infill lots or redevelopment areas for neighborhood parks to address deficiencies.

5 Preservation

Goal: Preserve environmentally sensitive and historically significant areas.

a. Preserve conservancy lands that can be adequately protected without public expenditure. Use public funds and grants to acquire conservancy lands that cannot be protected through other means or where public access is a priority.

b. Incorporate and promote natural features, including floodplains, wetlands, and woodlands as passive recreation areas.

c. Preserve and/or appropriately develop environmental corridors.

d. Identify and incorporate historical assets into the development of City Parks.

e. Develop and incorporate interpretive signage identifying the historic significance of certain parks and community historic assets and areas.

6 Park Amenities and Maintenance

Goal: Provide residents with safe, reliable and accessible recreation equipment throughout the City park system.

a. Replace unsafe, old and deteriorating recreation equipment in all City parks.

b. Regularly monitor and maintain existing park equipment to ensure its longevity and safety.

c. Identify and replace park facilities that do not comply with the Americans with Disabilities Act (ADA) guidelines, ensuring accessibility for all individuals.

d. Continue to implement findings from accessibility audit test to improve the overall accessibility of the park system.

e. Identify and replace any playground equipment that does not meet the safety guidelines set by the Consumer Product Safety Commission (CPSC) or American Society for Testing and Materials (ASTM).

f. Incorporate a diverse range of park amenities and facilities that cater to the needs of different age groups, providing a variety of recreational opportunities.

Funding

Goal: Utilize all available funding sources to further enhance the quality of the City's Park system.

a. Pursue funding from State and Federal programs to support the acquisition and development of recommended park system improvements.

b. Solicit donations from the public and private organizations to contribute towards park system development.

c. Update the City's Comprehensive Outdoor Recreation Plan every five years to maintain eligibility for grants.

d. Develop and maintain revenue-generating facilities that can assist in funding the development of new facilities and the maintenance of existing facilities.

e. Review the current land dedication ordinance and explore opportunities to update Park Impact fees.

f. Assess the feasibility of implementing user fees to support the development and maintenance of facilities.

8 Subdivision/Development Review

Goal: Coordinate subdivision review with all Departments and Boards to ensure adequate park facilities are provided.

a. Prior to approving subdivision plats, consult the City's Comprehensive Outdoor Recreation Plan and incorporate the identified needs.

b. Continuously evaluate and update the Subdivisions section of the Municipal Code to ensure that it effectively addresses the park and recreational needs of City residents.

c. Utilize extraterritorial plat review powers to ensure that residential developments outside the City limits proportionally contribute to providing adequate neighborhood park facilities in developing areas.

9 Forestry

Goal: Maintain the Citywide Urban Forestry Program.

a. Update the urban forestry ordinance and management plan to regulate tree planting, removal, and management on public and private lands. This will ensure eligibility for state and federal urban forestry grant-in-aid programs.

b. Remove dead trees and/or treat diseased trees on public lands within the city.

c. Remain compliant to the requirements of Tree City USA program.

d. Regularly assess the Gypsy Moth population and implement appropriate suppression measures.

e. Continue monitoring the City's urban forest for signs of Emerald Ash Borer infestation and promptly remove affected trees. Additionally, focus on replacing the lost trees with species that are not susceptible to infestation.

f. Develop a urban forestry database that identifies public tree species, diameter, condition, maintenance, etc.

g. Create an invasive species control plan for a community wide area, which will provide for detection, identification and monitoring of invasive species.

h. Promote active control procedures for identified populations of invasive species.

i. Maintain the tree planting program and enforce planting policies.

j. Provide technical assistance to residents on tree planting and care.

k. Collaborate with schools and other entities to promote Arbor Day in the community.

10 Budgeting

Goal: Adopt an adequate park budget, which can financially address existing park needs.

a. Utilize the Capital Improvements Program for the City's Comprehensive Outdoor Recreation Plan as a guide to establish yearly park budgets.

b. Allocate funds towards the development of facilities that will optimize the utilization of existing park and recreation areas, thereby increase park use.

c. Continue exploring alternative funding methods to meet both capital and operational requirements.

d. Give priority to the maintenance of existing facilities when allocating funds.

11 Trails

Goal: Provide residents with multi-purpose trail systems that utilize environmental corridors and provide linkages between parks and other appropriate features within and outside of the City.

a. Secure additional lands along environmental corridors to ensure public control.

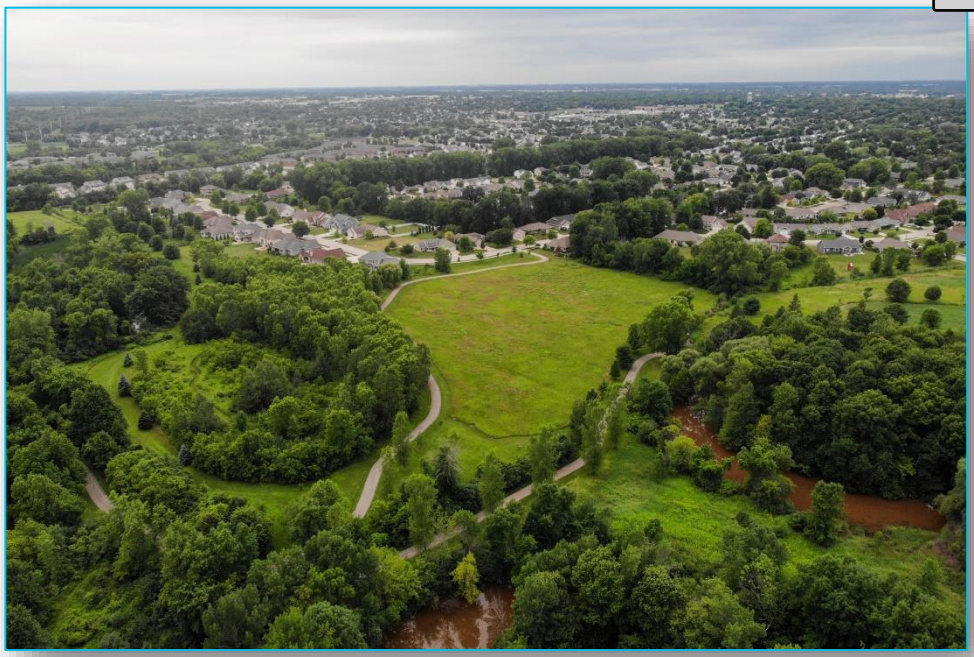

b. Develop multi-use trail systems that are barrier-free.

c. Establish connections between local trails and regional trail systems.

d. Develop and install sufficient directional signage on trails.

e. Integrate bicycle and pedestrian facilities into all Park and Recreation and Public Works projects. Review site plans to include necessary trail corridors

f. Adopt and implement a Complete Streets policy or ordinance.

Above: The East River trail spans nearly 6-miles. The trail begins in the City of Green Bay, and winds through the Village of Bellevue and Allouez, through De Pere to the Town of Ledgeview.

12 Sustainability

Goal: Promote and encourage the use of sustainable resources within the De Pere Parks and Recreation system.

a. Promote recycling in all parks.

b. Conduct research and support the development of a plan to establish and promote community gardens.

c. Encourage the use of recycled materials for park and recreation equipment, surfaces, furniture, and maintenance.

d. Review current mowing practices and identify opportunities for non-mowed and/or native plantings in green spaces.

e. Utilize energy efficient lighting in parks and facilities.

f. Advocate for the use of alternative energy sources.

g. Incorporate rain gardens and other stormwater management. methods into park design.

h. Use pollinator friendly plants in park landscaping projects.

i. Minimize the use of pesticides and herbicides on public land.

13 Water-Based Recreation

Goal: Promote water-based recreation such as fishing, boating, and swimming throughout the community.

a. Enhance and maintain access to the Fox River.

b. Promote and maintain the city-operated boat launches.

c. Promote and maintain outdoor aquatic facilities and perform regular water quality testing.

d. Continue development and maintenance of the Riverwalk.

14 Planning

Goal: Maintain a current Comprehensive Outdoor Recreation Plan

a. Continuously monitor the park and recreation needs of the community.

b. Update the action plan and implementation plan annually to reflect evolving needs and implemented recommendations.

c. Update the entire Comprehensive Outdoor Recreation Plan every five (5) years to reflect changes in community needs and desires, and to maintain eligibility for state and federal grant-in-aid funding.

d. Seek public input in the planning and development of the Plan, as well as the location and development of parkland.

FISH IN THE FOX RIVER

The City of De Pere and the Fox River are renowned for the abundant fishing and wildlife viewing opportunities in our area. Whether you're standing on the De Pere Riverwalk for a one-of-a-kind vantage point of walleye or sturgeon spawning with your family, you're resting on our docks and shores for a relaxing fishing experience, or you're launching your boat out into the Fox River for an afternoon of fishing fun, De Pere is a destination for anyone looking to connect with nature.

Walleye

Walleye can be found year round in the Fox River, however they are most visible during their annual spawning run that typically occurs in late March and April. During this period, thousands can be viewed swimming in shallow water near the rapids below the De Pere Dam and around the viewing Pier. Adult walleye range from 3 to 15 years in age and from 14" to 30" in length and are a favorite fish of area sport anglers.

THE BENEFITS OF PLANNING FOR PARKS AND RECREATION PROGRAMS

Parks and recreation programs are vital for enhancing the quality of life for residents and visitors in De Pere. The specific benefits that parks and recreation programs bring to a community span a wide spectrum and play a significant role in promoting the City as a great place to raise a family, establish a business, and retire.

- Natural areas provide wildlife habitat, improve surface water quality, manage stormwater, enhance groundwater quality and improve air quality.
- Trees and other vegetation offer shade, reducing the urban heat island effect.
- Parks enable children and adults to connect with nature, fostering an understanding of the value of protecting the environment.

Above: Residents participate in a Yoga class outside the City of De Pere Community Center.

Health Benefits

- Parks, trails, and recreation programs provide opportunities for people to engage in physical activity at a level that suits their needs and abilities.

- Children who are active at an early age tend to stay active as adults.
- Exposure to nature can reduce stress levels and increase overall happiness.

Social Benefits

- Parks and recreation programs promote inclusivity across income, race, and physical abilities.
- Parks serve as spaces for social interaction allowing people to spend time with friends or meet new acquaintances. These spaces facilitate events such as park concerts, neighborhood picnics, farmers markets, encouraging outdoor engagement.
- Parks foster a sense of pride and community ownership.

Economic Benefits

- High quality parks and recreation programs influence individuals and businesses to stay or relocate to your community.
- Property values tend to increase in relation to their proximity to parks.
- Park related events can generate income for local businesses when visitors stay overnight, go out to eat, rent bicycles or kayaks, or stop at a convenience store.
- Environmental benefits can translate into financial benefits by reducing energy costs for heating and cooling and lowering utility costs for stormwater management.

The City of De Pere Parks, Recreation, and Forestry Department provides over 450 acres of parks and green space in the community, along with year-round recreational programs. Its robust park system serves as a valuable asset to the community.

The City of De Pere Comprehensive Outdoor Recreation Plan inventories and evaluates the existing park, trail and recreation program offerings to ensure that current needs are met and future requirements are identified and adequately planned for.

TRAIL CONNECTIONS

The City of De Pere has three separate trail systems navigating through the City Limits, compiling approximately 7.6 miles for your health and year-round enjoyment. While Voyageur Park and Preserve Trails are owned and maintained by the City of De Pere, the Fox River Trail is owned and operated by the Brown County Parks Department and the the East River trail is owned and maintained by the City of De Pere and several other abutting communities. Enjoy the fresh air and scenery - and have fun!

THE CITY OF DE PERE AND ITS RESIDENTS

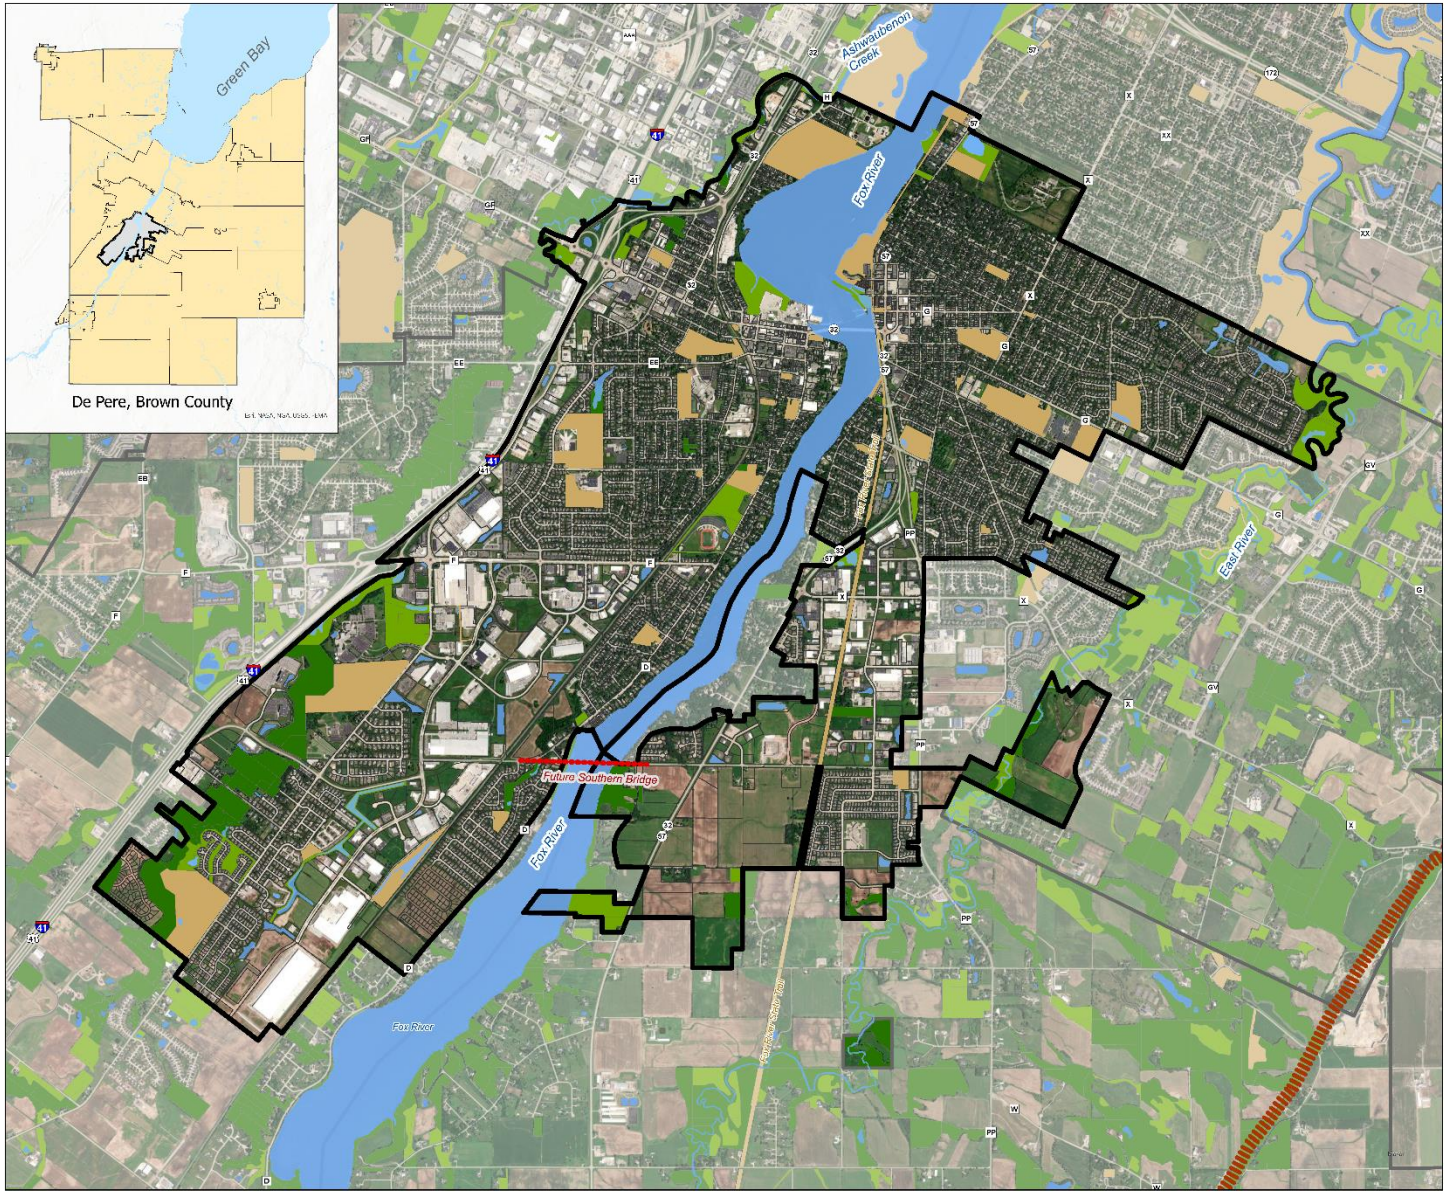

Geographical Context

The City of De Pere is located in west-central Brown County, in northeast Wisconsin. It is divided into east and west sides by the Fox River, which is a popular place for boating, fishing, and various water sports. Throughout history the Fox River has played a significant role, supporting First Nation cultures, French explorers, European settlers, and the growth of wood and paper products industries.

The City shares borders with the Village of Ashwaubenon to the northwest, the Village of Allouez and Village of Bellevue to the northeast, Town of Ledgeview to the east, Town of Rockland to the southeast, and Town of Lawrence to the southwest **(see Map 1).** Together with the City of Green Bay, this region is collectively known as the Fox River Valley. De Pere is accessed by U.S. Highway 41, Interstate Highway 41, State Highway 32 and State Highway 57.

Population Demographics

The State of Wisconsin Demographics Center and U.S. Census offer statistical data regarding the population of municipalities across the State of Wisconsin. This statistical data, also known as demographics, provides valuable insights into factors such as population growth, income, and age distribution. When evaluating park needs, the demographics of the City of De Pere will be analyzed and considered to identify any significant trends.

Population

Population growth results in more potential users of park facilities and recreation programs. The U.S. Census shows that in 2020, the City of De Pere's population was 25,410. **Table 1** shows that the City's population has increased since 1970 by an average of almost 12% per decade, with growth slowing to approximately 6% since 2010.

Table 2 demonstrates the City's projected population by the Wisconsin Department of Administration (DOA) population projections. The projections indicate that the City can expect to continue to grow throughout the planning period.

Age Distribution

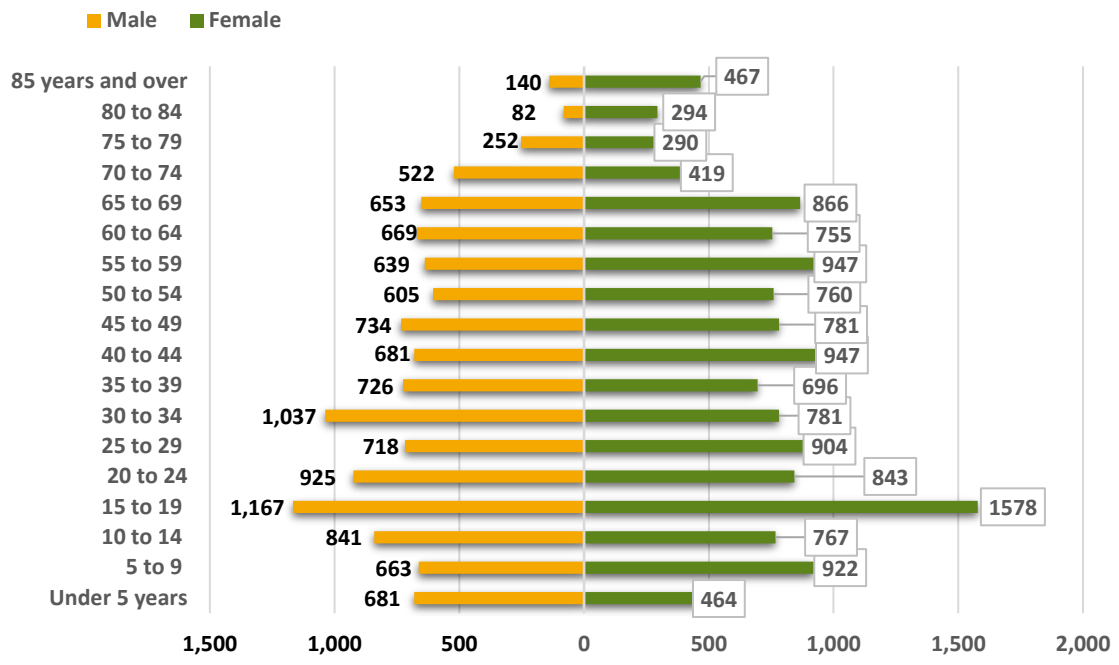

Recreation needs can vary based on an individual's age. By identifying age groups and the number of residents within those groups, the City can better anticipate the types of facilities required in the future. **Figure 1** illustrates the population distribution of De Pere by age and sex, in the form of a population pyramid. The figure illustrates a large group of residents aged 15 to 24 and 30 to 34.

The first group are high school and college age cohorts, and the second group contains "millennials" who are a large segment of the population that are beginning to start families. This indicates a likely future increase in young children under 5, that are not represented in this figure. The median age of a De Pere resident is 36.0.

Race

The City of De Pere has a predominantly homogeneous population. According to the 2021 American Community Survey, approximately 90% of the residents in City identify as white, 1% Black or African American, and 4% Asian, 1% American Indian and Alaska Native, and the remaining 4% as Some Other Race or belonging to two or more races.

CITY OF DE PERE PARK AND RECREATION SYSTEM EVALUATION

The National Recreation and Park Association (NRPA) provides guidelines for classifying parks, open spaces, and pathways. These guidelines include descriptions of each classification, size of the park or open space and the area it serves. By mapping the locations, classifications, and service area, gaps in service can be identified and addressed in the Comprehensive Outdoor Recreation Plan (CORP). **Map 2** illustrates the locations of parks, open spaces, and pathways in the City of De Pere, along with their respective classifications.

While NRPA guidelines are a useful benchmark for evaluating the City's parks and open space system to its peers, the unique landscape, development patterns, and preferences of the community will influence the types of parks and facilities that are ultimately offered. For example, in De Pere, the Fox River significantly influences the type and location of many of parks and facilities offered to residents and visitors.

Explore More!

For this reason, NRPA has deviated from one-size fits all recommendations for park standards and provide a yearly performance review based on community population. Nevertheless, the NRPA park classifications and their associated standards continue to prove useful in determining the variety of park types within the system, and how that influences the types of facilities provided at each park and open space area.

NRPA Park and Open Space Classification Standards

Mini Park / Tot Lot

- General Descriptions: Used to address limited, isolated, or unique recreational needs.
- Service Area: Less than ¼ mile distance in a residential setting
- Size Criteria: Between 2,500 sq. ft. and one (1) acre in size.

Neighborhood Park

- General Descriptions: The basic unit of the park system. It serves as the recreational and social focus of the neighborhood. Focus is on informal active and passive recreation.
- Service Area: ¼ to ½ mile distance and uninterrupted by non-residential roads and other physical barriers.
- Size Criteria: 5 acres is considered the minimum size. 5 to 10 acres is optimal.

Community Park

- General Descriptions: Serves broader purpose than a neighborhood park. Focus is on meeting community-based recreation needs as well as preserving unique landscapes and open space.
- Service Area: Determined by the quality and suitability of the site. Usually serves two or more neighborhoods and ½ to 3-mile distance.
- Size Criteria: As needed to accommodate desired uses. Usually between 30 and 50 acres.

Large Urban Park

- General Descriptions: Large urban parks serve a broader purpose than community parks and are used when community and neighborhood parks are not adequate to serve the needs of the community. Focus is on meeting community based recreational needs, as well as preserving unique landscapes and open spaces.
- Service Area: Determined by the quality and suitability of the site. Usually serves the entire community.
- Size Criteria: As needed to accommodate desired uses. Usually a minimum of 50 acres, with 75 or more acres being optimal.

Above: Voyageur Park in the City of De Pere operates as a Community Park day to day, and a Large Urban Park for community wide events like the Beer Garden or City Band concerts.

School Park (includes Private Parks)

- General Descriptions: Depending on circumstances, combining parks with school sites can fulfill the space requirements for other classes of park, such as neighborhood, community, sports complex, and special use.
- Service Area: Determined by location of school district or private property.
- Size Criteria: Variable – depends on function.

Conservancy / Natural Resource Areas

- General Descriptions: Lands set aside for preservation of significant natural resources, remnant landscapes, open space and visual aesthetics/buffering.
- Service Area: Resource availability and opportunity.
- Size Criteria: Variable

Special Use Areas

- General Descriptions: Covers a broad range of parks and recreation facilities oriented toward single-purpose visit.
- Service Area: Variable. Dependent on specific use.
- Size Criteria: Variable

City of De Pere Park, Open Space Inventory

The City of De Pere has jurisdiction over 35 parks and recreation areas within the City limits. These parks offer a wide range of amenities for residents and visitors. The smallest being the 0.14-acre George Park in northeast De Pere and the largest being the 95.5-acre Southwest Park located in southwest De Pere. In June 2017, a park, open space and pathway inventory was conducted. Each facility was visited, and pertinent information was gathered. This plan updates the inventory to account for implemented priorities over the last 5-years, as well as changed priorities resulting from other City long-range planning efforts. **Table 3** highlights the park amenities for each park within the system. You can find a detailed park profile for each park in **Appendix A** of this plan including:

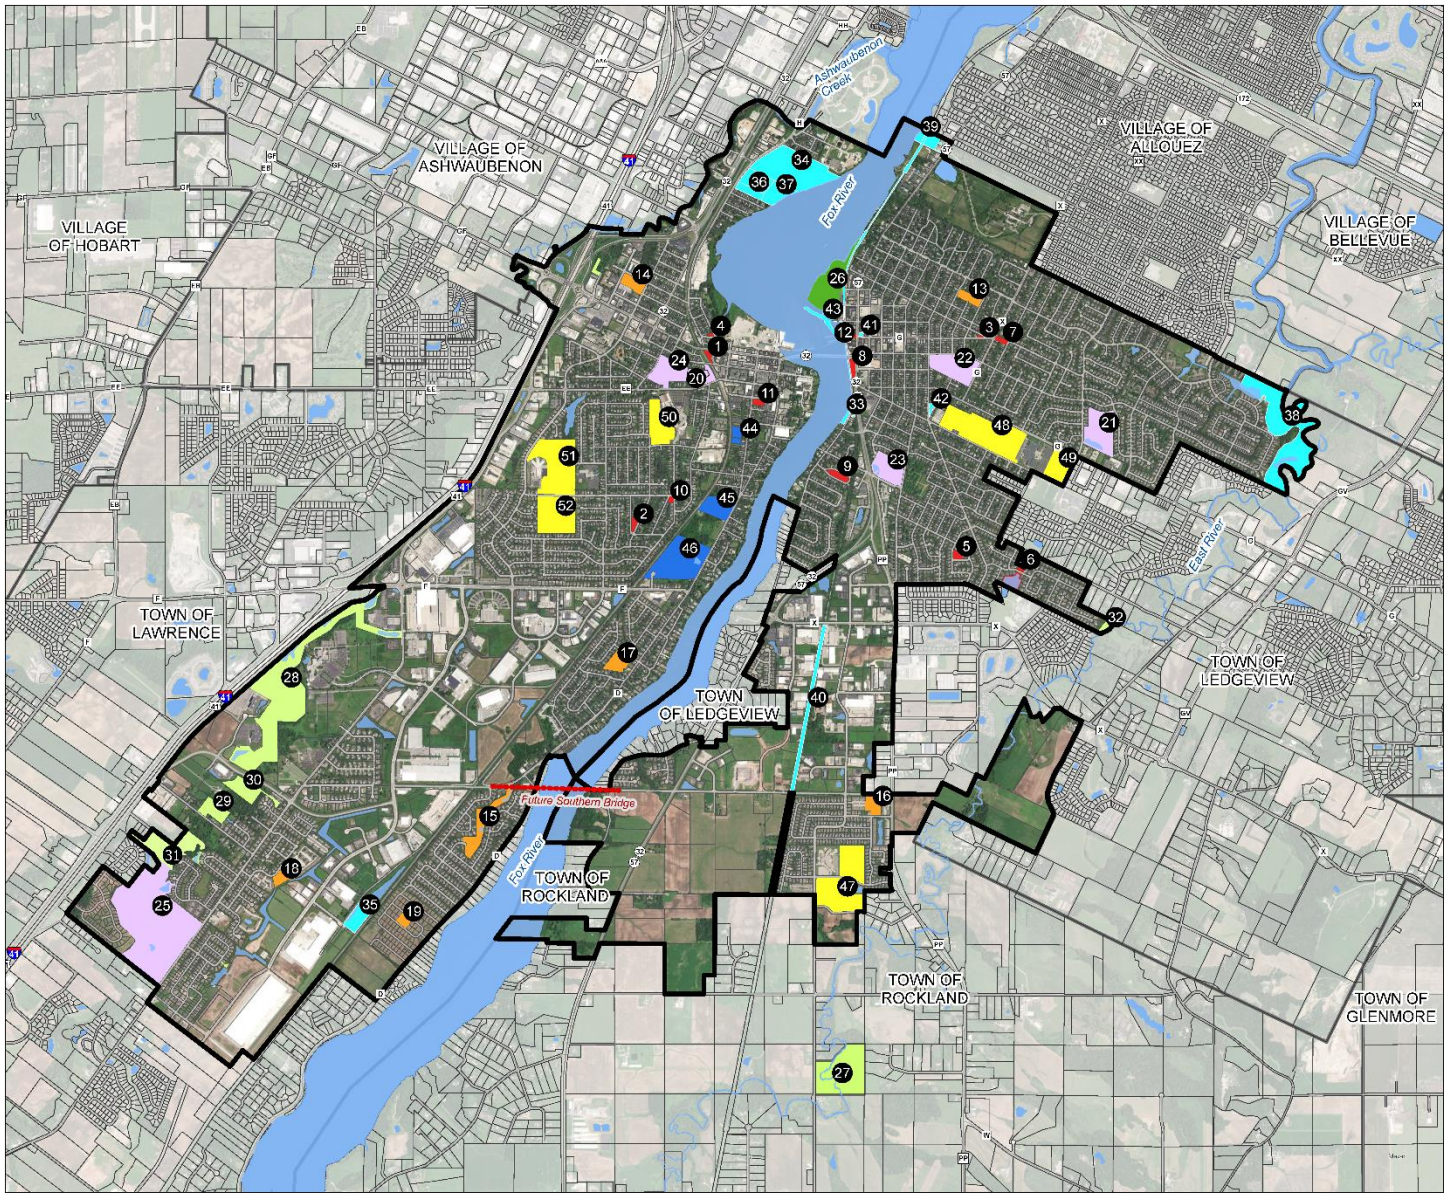

- Location of park
- Size
- Jurisdiction
- Classification
- Year created or acquired
- General description
- Amenities

Map 2 illustrates the location and classifications of these parks, open spaces and pathways in the City of De Pere. It is important to note that the majority of the City's parks, as well as the variety of amenities, are concentrated in the northern half of the community. This area is the oldest part and most established section of the City.

LEVEL OF SERVICE EVALUATION

The City of De Pere Comprehensive Outdoor Recreation Plan utilizes various methods to assess the level of service that parks and open spaces provide to residents, visitors, and user groups. At the same time, communities must take into consideration their unique features that influence the types of recreational offerings available to the community. The City of De Pere Comprehensive Outdoor Recreation Plan will evaluate its parks and open spaces based on the following:

- National Recreation and Parks Association (NRPA) performance review for communities 20,000 to 49,999 in size.
- National Recreation and Parks Association recommendations for park service boundaries
- A regional comparison of park space to other communities
- Results of a User Group / Stakeholder Park and Facility Needs Assessment Survey

Quantitative Analysis

Based on the *2023 NRPA Agency Performance Benchmarks*, an average park and recreation agency generally maintains one park for every 2,287 residents and manages 10.8 acres of parkland. These benchmarks serve as the median values for communities of all sizes. The report further provides a breakdown of the median, upper quartile, and lower quartile figures based on community size. **Table 4** presents a comparison between the 2023 benchmarks and the corresponding figures for the City of De Pere.

The National Recreation and Parks Association (NRPA) also offers recommendations for the distribution of each classification of parks within a park and recreation system. The three (3) types of parks evaluated as part of this plan and their recommended acreages include:

- Community Parks: 5 to 8 acres per 1,000 residents
- Neighborhood Parks: 1 to 2 acres per 1,000 residents
- Mini-Parks: 0.25 to 0.5 acres per 1,000 residents

These Park classifications collectively establish a range of 6.25 to 10.5 total acres of parkland per 1,000 residents. Generally, these three park classifications form the main components of a park system. However, other park classifications such as Large Urban Park, Natural Resource Area, and Special Use Area highlighted above, are unique to each community, and therefore, specific recommended acreage are not provided.

In the City of De Pere's case, Southwest Park and Voyageur Park primarily function as Community Parks but serve as Large Urban Parks at other times. As a result, they are included in the overall Park and Recreation calculations mentioned below and classified as Community parks.

Table 5 illustrates that the city falls within the recommended acreage ranges for community, neighborhood, and mini-parks based on the estimated population of the city in 2022. The city also provides 108 acres of natural resource areas and 126 acres of special use parks, which include the Brown County Fairgrounds and Fox River Trail. Taking into account all public parks and open space areas in the City of De Pere, there are approximately 19 acres of parks and open space per 1,000 residents.

Geographic Analysis

The National Recreation and Parks Association (NRPA) provides recommendations for the area served by community parks, neighborhood parks, and mini parks. The three (3) types of parks and their recommended service areas include:

- Community Parks: 0.5-to-3-mile service radius
- Neighborhood Parks: 0.25-to-0.5-mile service radius
- Mini-Parks: up to 0.25-mile service radius

Map 3 shows the Park Service Boundaries for community parks, neighborhood parks, and mini-parks in the City of De Pere. Residents living in the northern portion of the City have many park options available within a reasonable distance. In this area, residents have access to eleven (11) mini-parks, two (2) neighborhood parks, and three (3) community parks. The Main Avenue Bridge enhances access to parks in this area over the Fox River that connects East and West De Pere.

There are six (6) neighborhood parks located in the southern portion of the City. These are located in the more recent residential subdivisions. Five (5) of these are located in West De Pere. Southwest Park is the sole community park in the southern portion of the community. In 2022, the Wisconsin Department of Transportation dedicated funds for the "South Bridge Connector project. This bridge would provide an additional bridge crossing of the Fox River in this area of the City, which would increase park access for residents. The project is anticipated to be completed by 2029.

Regional Peer Comparison

The Comprehensive Outdoor Recreation Plans or Comprehensive Plans were reviewed for several communities in Brown County, as well as similarly sized communities in Wisconsin. Only parkland designated for public use, whether developed or not, was included in the park acreage totals. Recreational land associated with schools or private organizations was not counted.

Table 6 shows the parkland per 1,000 residents in each community. The average community parkland acreage per 1,000 residents is 14.5 acres for communities in the table. The City of De Pere has 19.1 acres per 1,000 residents.

Parkland Projections

Tables 5, 6, and 7 show the projected minimum parkland needed for community parks, neighborhood parks and mini parks.

The City of De Pere currently satisfies the NRPA recommended minimum acreages for community parks, neighborhood parks, and mini parks throughout the planning horizon.

However, the City of De Pere's population is expected to grow from 25,361 in 2022 to 30,053 in 2040, resulting in an increase of 4,692 residents. Without expanding the parkland acreage over that time, this population growth would decrease the level of service from 19.1 acres of parkland per 1,000 residents to 16.1 acres.

DOG PARK & TRAIL

Wide-open space to run and smell and roll and climb and jump? Check. A fun-filled place to meet new furry friends? Most definitely. Scenic woods to walk through and enjoy the beauty of Wisconsin's seasons - along with the companionship of your human buddies? Yep. The De Pere Dog Park gives "man's best friend" all that, and so much more!

RECOMMENDATIONS FOR OUTDOOR RECREATION PROVISIONS

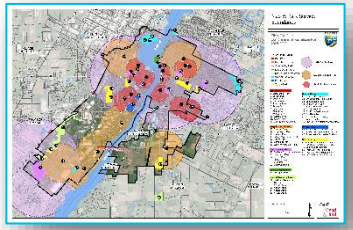

Planning Process

May	June	July	August	September	October	November

May – June 2023
- Review existing planning documents.
- Data collection, inventory, and existing conditions evaluation

July – August 2023
- Document and Maps Creation

June – August 2023
- Public open house
- Conduct community survey
- Hold stakeholder interviews

September – October 2023
- Preliminary & Final Draft staff review

October 2023
- Board of Park Commissioners review & recommendation

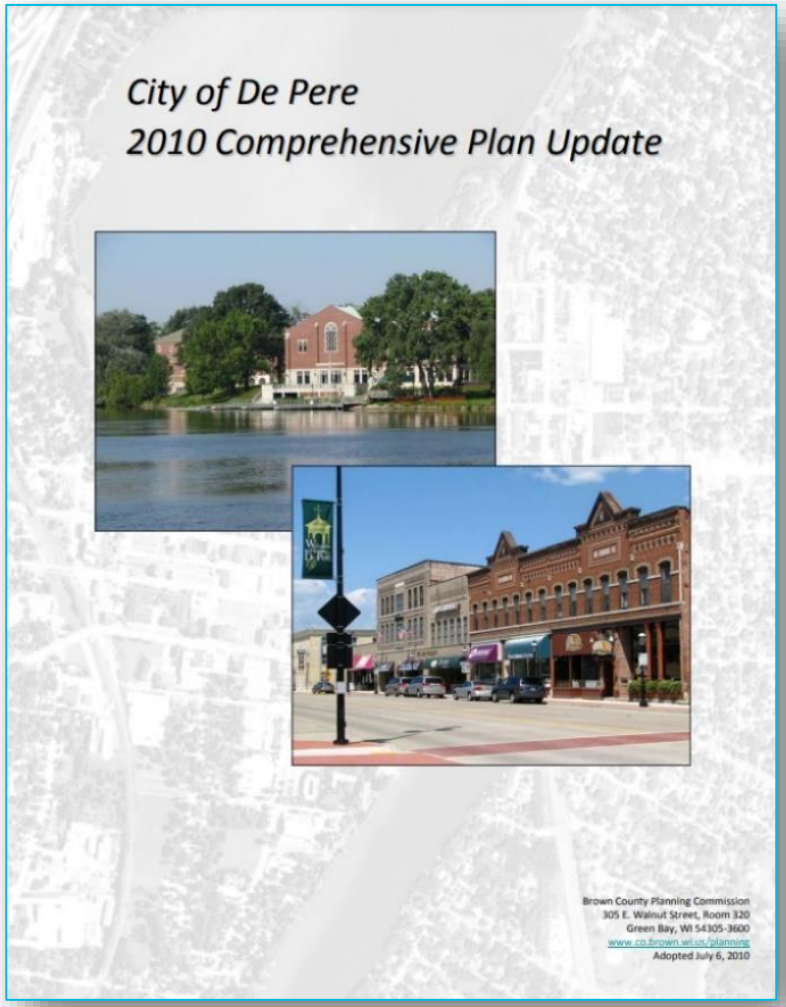

November 2023
- City Council Adoption

To arrive at recommendations for improvements for each City of De Pere Park and open space areas, several metrics were evaluated.

1. Review of the previous Comprehensive Outdoor Recreation Plan and other City of De Pere long range planning documents
2. Quantitative and Qualitative analysis of the existing parks and their service areas based on NRPA standards and agency benchmarks.
3. Findings from public involvement (Community Survey, Open House, Stakeholder meetings)
4. Review and input from the City of De Pere staff, Board of Park Commissioners, and City Council

Review of City of De Pere Long Range Planning

CITY OF DE PERE COMPREHENSIVE PLAN (2010)

The City of De Pere Comprehensive Plan serves as the city's primary long-term planning guide. It highlights the significance and benefits of the city's Parks and Recreation system, as well as its natural areas, for both the city and its residents.

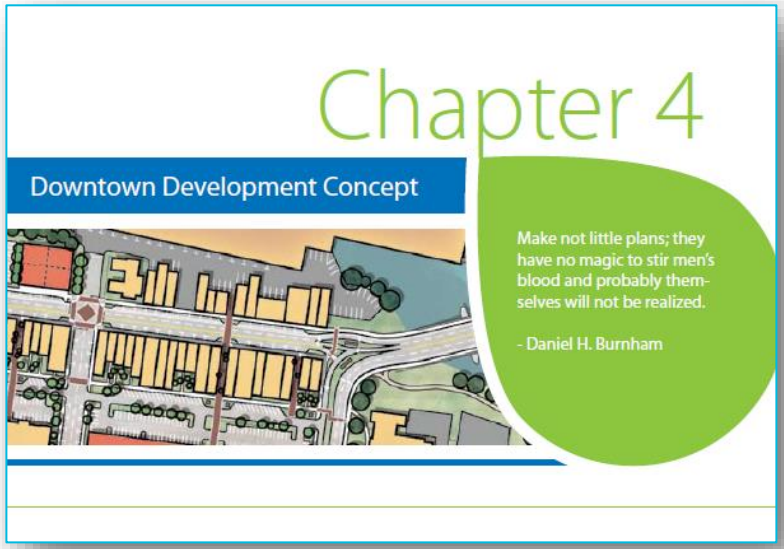

The document outlines a multifaceted approach to enhance the city's Parks and Recreation system, ensuring safe pedestrian and bicycle connections to various destinations, including parks, schools, employment centers, shopping areas, and subdivisions. Additionally, the plan emphasizes the integration of natural features such as trails, bike paths, and greenspaces into new developments and parks, enriching the city's green environment.

To expand greenspace within residential areas, the plan calls for the creation of small neighborhood parks and recommends the inclusion of neighborhood greenspace and parks in new residential developments, with each neighborhood featuring a dedicated five-acre park. Furthermore, a community park is proposed near Altmayer School to provide opportunities for active and passive recreation.

The plan also recognizes the need to plan and develop new recreational facilities while expanding activities within existing parks to cater to the diverse needs of the city's population. It underscores the importance of considering significant natural resources when selecting park locations and emphasizes enhancing the accessibility of public lands along the Fox and East Rivers. To this end, parkways along waterways are recommended, offering opportunities for passive recreation, multipurpose trails, and amenities like benches and picnic tables.

Collaboration is a key theme in the plan, advocating for a partnership with the Village of Ashwaubenon to establish a trail connection to Ashwaubomay Park and the Fox River State Trail. Additionally, the plan emphasizes the preservation of wetlands, floodplains, and environmental areas to serve as wildlife corridors, pedestrian trails, and stormwater management resources. Coordination with neighboring communities and alignment with the Brown County Open Space and Outdoor Recreation Plan are encouraged.

In terms of community involvement, the plan stresses the importance of fostering partnerships with local nonprofit and volunteer organizations to enhance the park and recreation system. Moreover, collaboration with school districts for facility sharing and joint planning is recommended as participation in various sports leagues within the city continues to grow. Finally, the plan suggests continuing cooperative efforts with Brown County regarding the fairgrounds and shoreline development to ensure a cohesive and well-planned recreational landscape for the city and its residents.

DOWNTOWN MASTER PLAN (2010)

The City of De Pere Downtown Master Plan serves as a planning document unifying community vision for Downtown De Pere. The plan calls for improvements or additions to the City's parks and recreation facilities. The plan outlines two broader opportunity areas in the City, the East Bank and West Bank. These include improvements to the Voyageur Park, De Pere Riverwalk and Wildlife Viewing Pier, Wells Park, and the West Riverfront.

Voyageur Park

To enhance the park's appeal and functionality, several improvements and additions are recommended. These include better internal trail circulation and increased connections to the Fox River Trail and neighboring communities. To attract families, the introduction of additional attractions like a Ferris wheel or carousel is suggested, which should complement, rather than compete with, Bay Beach. The plan also advocates for an improved performance venue, possibly a riverside performance or dance pavilion, and the introduction of water taxi services along the Fox River, potentially coordinating with Fairgrounds improvements. Other proposed enhancements encompass upgraded playground facilities, the introduction of fitness programs and innovative exercise courses, increased interaction with the water through amenities like fishing piers, overlooks, and viewpoints, and the possibility of offering rentals for bicycles and various water recreation activities, including kayaking, canoes, and paddle boats. These enhancements aim to diversify the park's offerings and provide a more engaging experience for visitors.

De Pere Riverwalk and Wildlife Viewing Pier

The Plan calls for the redevelopment of the George Street Landing to connect to the De Pere Riverwalk and Wildlife Viewing Pier. This establishes the riverwalk as a direct connection between Voyageur Park and Downtown. Two related concepts were developed that envision adjacent redevelopment structures, a public marketplace, multi-use open space, and a riverwalk extension. The extension via bridge leads from a stairway and elevator in a redeveloped building across the Fox River trail and canal to Government Island. An observation tower would be added to provide a unique vantage point of the river, and to bring visitors back to ground level.

Above: Concept for the redevelopment of the area surrounding George Street landing and a pedestrian bridge connection to Government Island and the De Pere Riverwalk and Wildlife Viewing Pier. Right: Concept of an observation tower for the Fox River and pedestrian access to ground level. (RDG Planning & Design)

Wells Park Promenade

The plan calls for re-envisioned Wells Park concept includes a two-level development, an upper Broadway-level urban promenade showcasing river views and a lower Front Street-level carved into the slope, providing parking and walk-out retail or restaurant spaces. On the main upper level, a well-lit pedestrian promenade connects the Claude Allouez Bridge's pedestrian walk to the Front and Broadway intersection across from City Hall. This processional feature gradual curves and angles that provide unique city views.

The plan also incorporates a stairway, potentially an elevator, and a well-defined crosswalk aligned on Lewis Street to serve the lower level of the promenade. Additionally, it includes retail spaces and covered parking at the Front Street walkout level, with diagonal on-street parking in front of storefronts.

Figure 4.5: **Wells Park Promenade**

Above: Concept for the redevelopment of Wells Park. (RDG Planning & Design)

West Riverfront

The plan calls for redeveloping largely undeveloped riverfront area between the Thilmany Nicolet Mill and US Paper Mills offers a unique recreational and environmental opportunity. This western riverfront zone encompasses various features, including the city's ice rink, recreation center, Brown County Fairgrounds, public space near the De Pere wastewater treatment plant, and Ashwaubenon's Ashwaubomay Memorial River Park and Trail. To maximize this area's potential, cooperation between the two cities, Brown County, and other agencies is recommended to create an integrated master plan. The parks and recreation component of this include providing public access to the Fox River, considering development of a west bank trail extending from the West Bank business core along the riverfront north of US Mills. This trail could follow Fort Howard Avenue, pass through a residential neighborhood, and reconnect with the public riverfront at the De Pere boat launch. It would continue along the Fairgrounds and NEW Water wastewater treatment plant, ultimately leading to Ashwaubomay Memorial River Park and River Trail. A network of nature trails could branch off from the main trail, providing opportunities for outdoor exploration. Additionally, the development of a new shoreline park focused on environmental features and incorporating educational programming and facilities, habitat stabilization, and restoration efforts. Trailheads with parking and gathering spaces could support outdoor classes and activities. Also, to improve connections between the west and east park system the plan recommends exploring the creation of a new dock on the west side of De Pere. A water taxi service along the Fox River or connections to Voyageur Park during special events could be considered as part of this development.

CULTURAL DISTRICT MASTER PLAN (2018)

The City of De Pere Cultural District Master Plan is the culmination of three days of charrette to study how the development of the Mulva Cultural Center influences the surrounding area. The plan is an effort to define a district incorporating its surroundings into a unified master plan.

The plan ultimately explores three alternative concepts focused on public improvements to transportation, land use, infrastructure, and public space. The plan finds a preferred alternative that recommends improvements to existing park and recreation facilities including George Street Landing, Wells Park, and Voyageur Park.

Voyageur Park

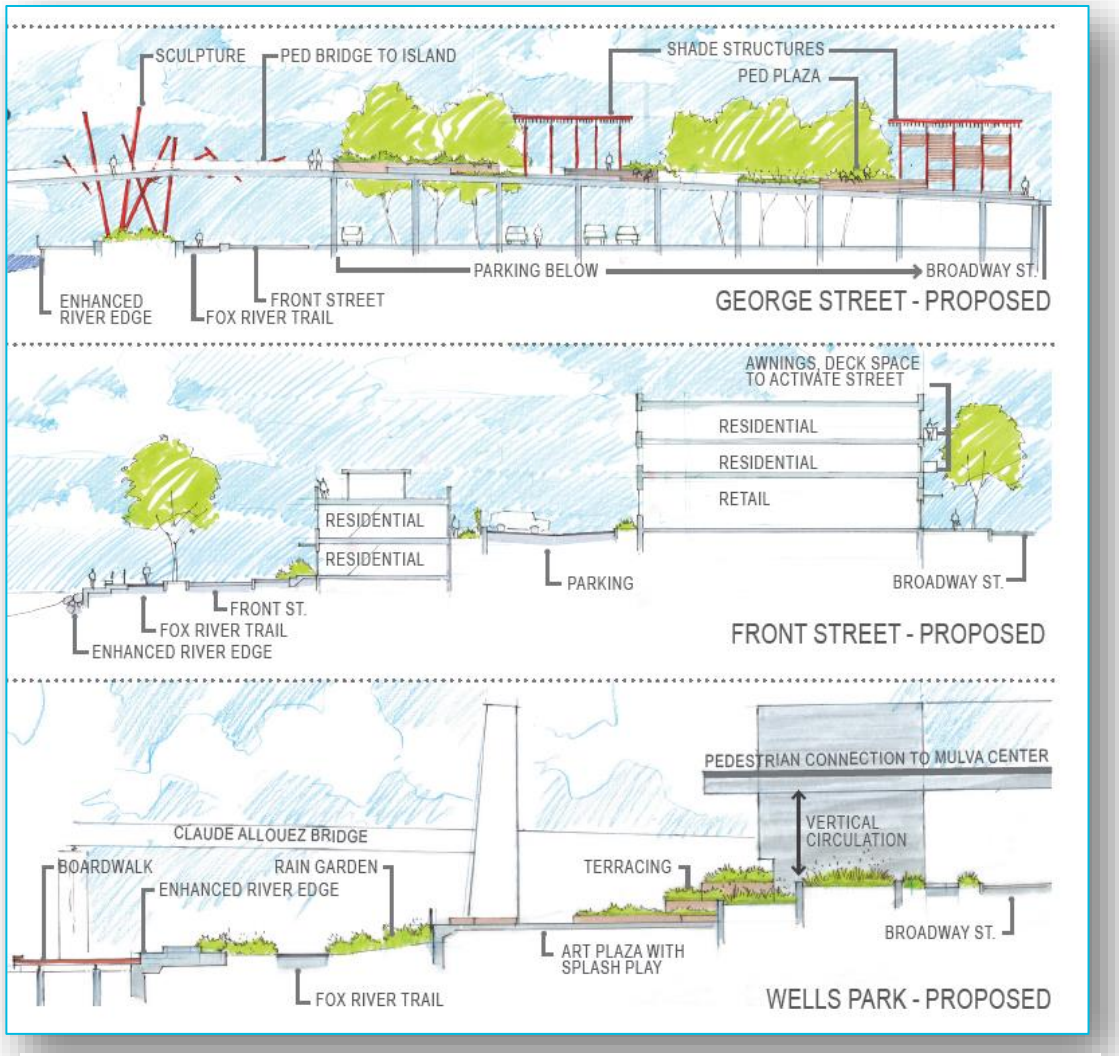

The plan calls for incorporating kayak rental, dockage, and storage/rental structure downstream from the locks away from boat traffic and prime fishing areas. It also recommends enhancing and expanding existing park amenities, specifically focusing on improving fishing opportunities and enhancing the playground and large gathering areas. It also calls for adding an amphitheater or performance spaces that are well-suited in size, thoughtfully programmed, and carefully designed.

Wells Park, Front Street, George Street Landing

The plan recommends the redevelopment of Wells Park into an urban plaza space. The park would include terraced seating and a small performance area., splash pad, and an art plaza. The redevelopment would also include a waterfront pavilion and boating access to activate the riverfront.

The plan also calls for the redevelopment of the Front Street at the river connecting to the George Street landing, which would include outdoor rooms with art, shade, seating, and entertainment.

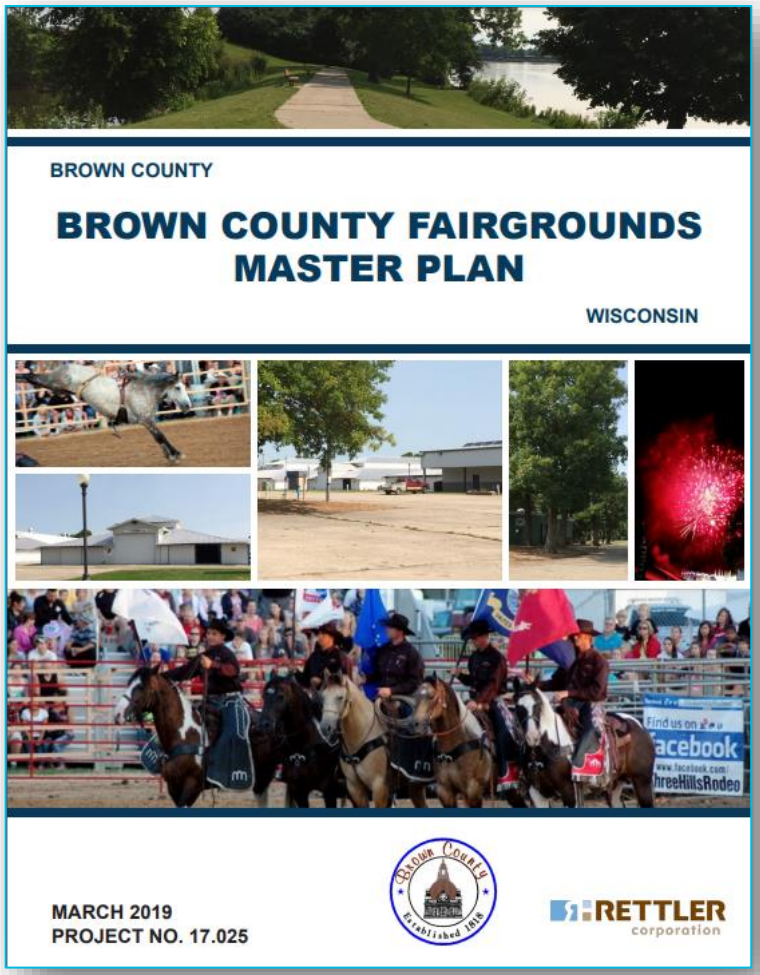

The plan also recommends a pedestrian bridge connecting the downtown to Government Island and the De Pere Riverwalk and Wildlife Viewing Pier

Above: Sketched elevations of the proposed improvements to Wells Park, Front Street, and George Street Landing. (SmithGroup JJR)

Above: Redevelopment concept of Wells Park (SmithGroup JJR)

BROWN COUNTY FAIRGROUNDS MASTER PLAN

The Brown County Fairgrounds Master Plan is a physical examination and inventory of the existing facilities, and a schedule for prioritizing needs and improvements for the site. The plan includes the Ice Arena building and surrounding facilities. It also looks at potential funding opportunities for projects within the plan.

Above: Brown County Fairgrounds Master Plan. (Rettler)

Several concepts were developed for the site and a preferred alternative was ultimately chosen. The Master plan calls for a riverside trail, improved access and parking, vendor spaces are provided in the parking lot for use during the county fair and other large events.

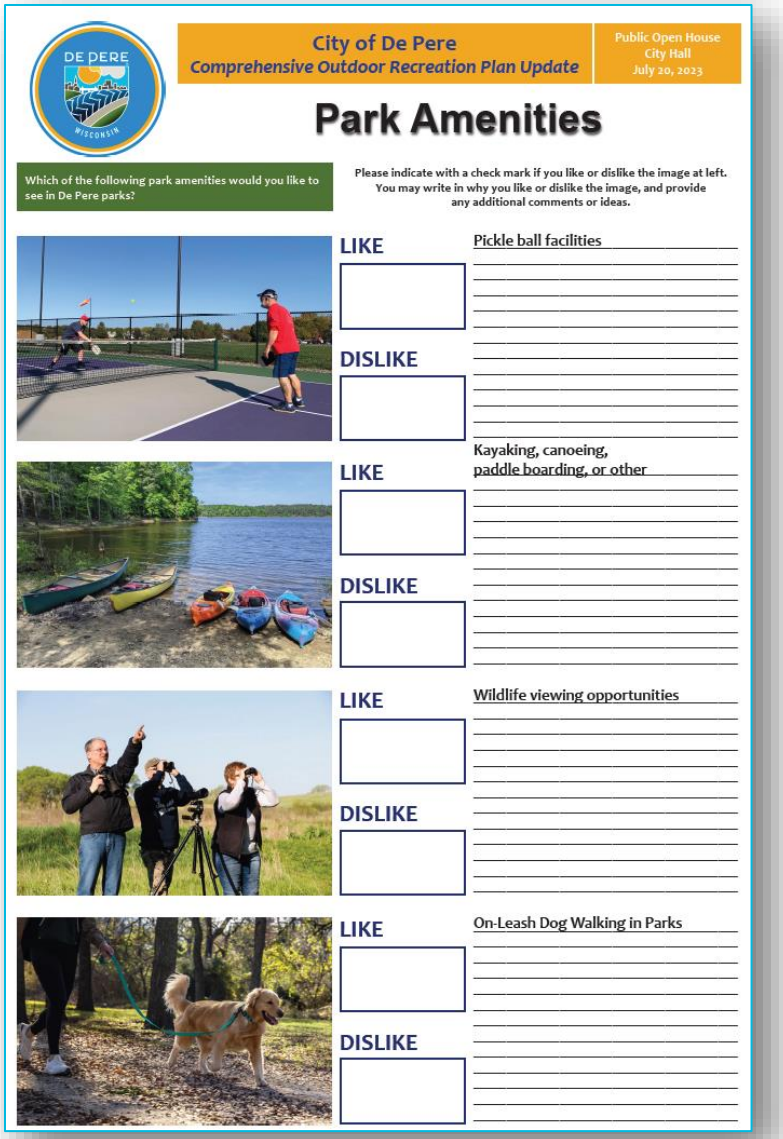

Findings From Public Involvement

To gain public input for the update of the City of De Pere CORP the City of De Pere conducted a Community Engagement public open house, conducted a community survey, interviewed key community stakeholders. Key findings are presented below.

A more detailed summary of the community survey, and stakeholder interview findings are found in **Appendix B**.

OPEN HOUSE & BOARD OF PARK COMMISSIONERS MEETING

The community engagement open house was conducted before a Board of Park Commissioners meeting on July 20, 2023. Several boards were created to solicit information about desired Park Amenities, and core services for the Parks and Forestry department. The Community Engagement Open House was advertised on the community survey postcard and City social media sites in advance of the meetings. No members of the community attended the open house beforehand, but several attended the presentation that followed. No members of the public attended the Open House during the previous CORP public involvement process.

Key Finding

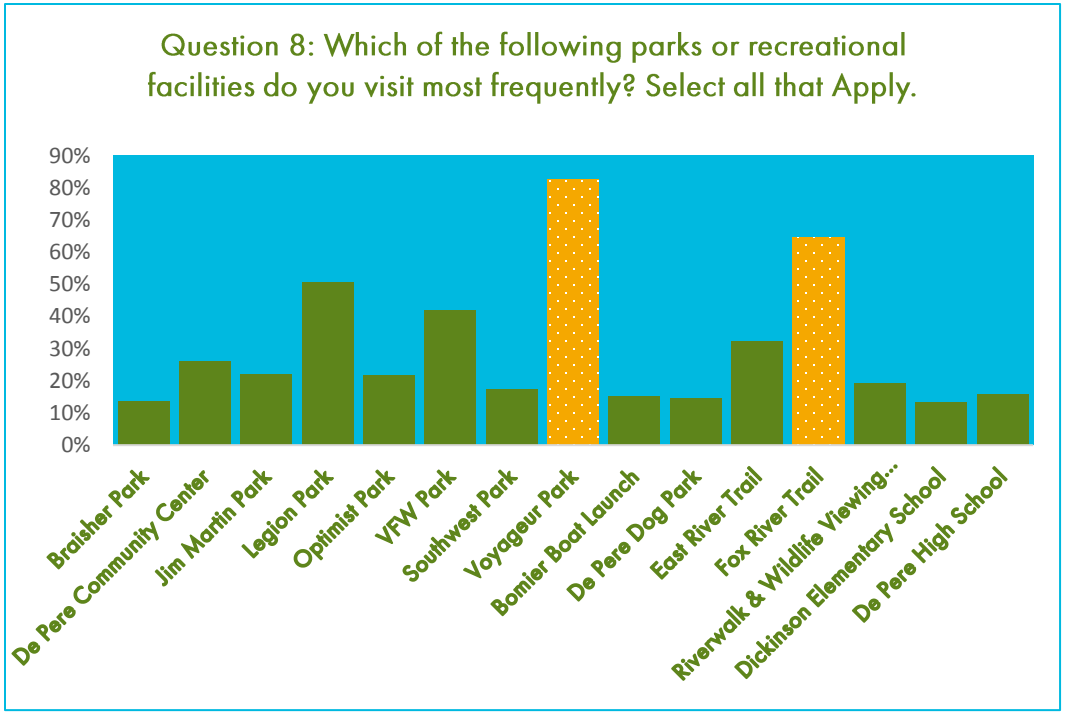

- *Additional opportunities for soliciting community preferences for park and recreation amenities will be important for future planning park planning. These efforts should focus on going to where people already congregate rather than holding open house style events that are not well attended.*

COMMUNITY SURVEY

The community survey was conducted online and included a total of 30 questions on a variety of Parks and Recreation focused topics of which a third focused on parks programming and facilities. The survey was advertised through a postcard and on the City's social media sites. The post card was distributed to local businesses, passed out at the June 27th, 2023, Beer Garden at Voyageur Park, and the July 25th, 2023 farmer's market. In total the survey received nearly 400 responses.

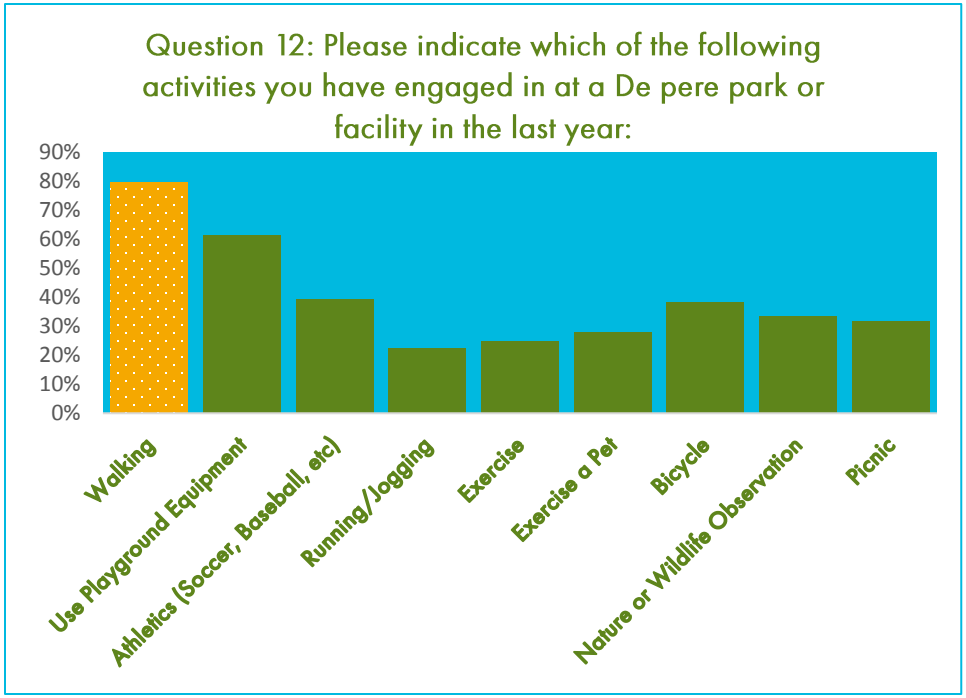

The responses were generally distributed among residents that have lived in the City or region 1-5 years; 6-10 years; 11-20 years; or 20 or more years. A large majority of respondents were women (75%) and ranged in age from 15 to 81 years old. Typically, respondents received their information about parks and recreation from social media or in combination with the Park's Department website and word of mouth from friends and neighbors. The majority had never used the interactive map of parks and recreation facilities.

Question 8 shows that there are a few parks that receive most frequent park users. These parks are those that would be expected to receive frequent use because they are Community Parks. Notably all the parks listed in the survey received at least one response (with the exception of George Park, which has no formalized programming). Those shown in the figure to the left are those that received at least 40 responses. The most visited park is Voyageur Park with 82% of respondents indicating they visited frequently. The most visited trail was the Fox River Trail with 65% of respondents. Question 10, which asked which is a respondents favorite to visit also found that these two facilities are the favorites.

Key Findings

- *Community parks in the City park system are well visited and should remain the priority of the park and recreation system.*
- *Connections between community parks, downtown, and other key community facilities via a robust trail network is likely to be well used by residents. Providing connection to and between this network and the Fox River Trail will also ensure those visiting from the region have access to the other community assets the City of De Pere.*

Question 12 shows that the primary reason people visit parks include walking (80%) and use of playground equipment (61%). Those responses shown in the figure to the left are those that at least 20% of respondents engaged in. It is important to note that this list includes both passive and active recreational activities. This highlights the significance of maintaining a balance between these user groups within park and recreational facilities. Additionally, considering the City's proximity to the Fox River and East River, it is noteworthy that boating, kayaking, and canoeing received a response rate of only 15%. Similarly, it's crucial to acknowledge that exercising a pet was the seventh-highest choice, with a response rate of 28%, even though pets are not permitted within City of De Pere Parks.

Key Findings

- *Respondents frequently used the parks paths and trails for walking, running, and bicycling. This indicates the importance of implementing ADA improvements to ensure these areas are accessible for all abilities.*
- *Playground equipment is widely used, which indicates the importance of maintenance and improvement of these park amenities.*
- *Athletic fields are well used and should continue to be a focus of overall parkland development, in particular for new and existing community parks.*
- *A substantial segment of the City's residents do not abide by existing "Dogs in parks" rules. The City should revisit the question of allowing pets within the City's parks and trail system.*

Question 15 asks, "Are there any reason's you don't use parks in De Pere?". Overwhelmingly 65% responded "I love De Pere parks and already use them!". The next highest answers were "other" (15%), "Parks too far away" (7%) and "I can't walk/bicycle to the park" (8%). This indicates that for those who are not using the parks there is a consensus that multimodal connectivity is needed.

"Would be nice if dogs could share in parks"

"I use the parks, but wish there were more connecting bike and walking trails"

"Not enough shade. The play equipment gets hot for the kids to play on."

"Dogs frequent the parks, especially Patriot Park even though there is a sign specifically stating 'No dogs allowed'."

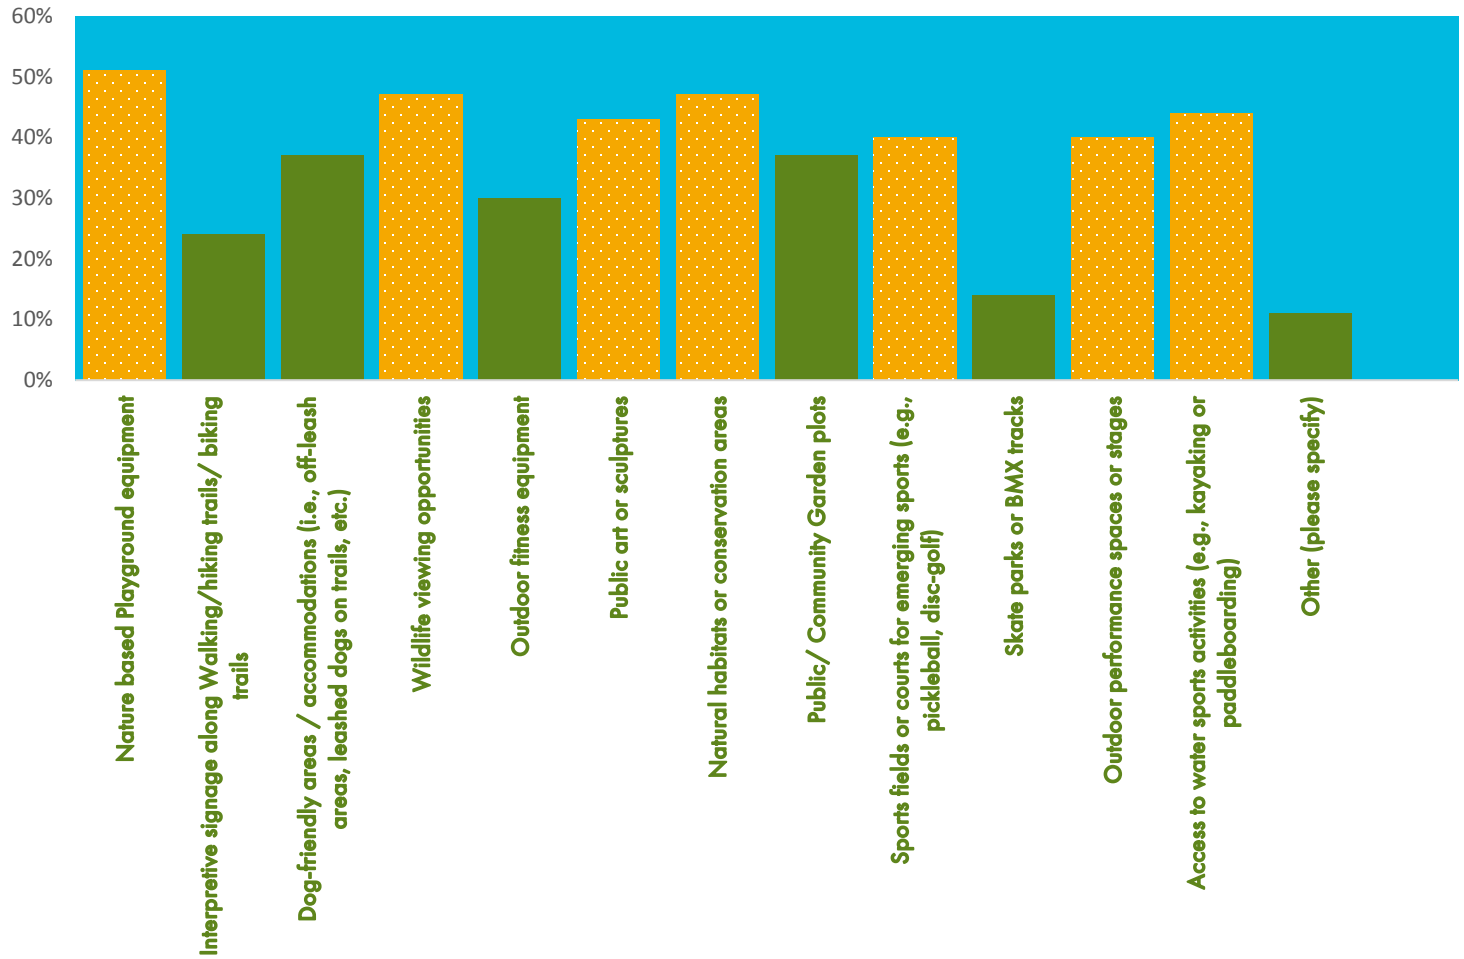

"We enjoy parks but children need more unstructured play and exploration. I wish there were some parks that weren't the big, expensive, limited play equipment but were made of logs, things to climb, build, maybe even a treehouse."

The "other" responses, some shown to the left, fell into three categories. The first related to being in favor of dogs in parks, and the need for cleanup with this use. The second the need for more bike and trail facilities within the system, in particular connecting parks within the system. The third was related to the need for shade in the parks.

Key Findings

- Largely the City's Park and recreation system is meeting the needs of the community.
- Continued investment in multi-modal connections within the park system is favored by respondents.
- The City should revisit the question of allowing pets within the City's parks and trail system. Enforcement and cleanup will be important considerations.
- Existing parks should be evaluated for the presence of shade trees near playground structures. This emphasizes the importance of the City's urban forest management. Consider use of 'natural playground" materials in parks where appropriate.

Question 28: Which of the following park amenities would you like to see in DePere parks? Please check all that apply. If there are any other amenities or features not listed that you would like to suggest, please write them in the "Other" option.

Question 28 shows that there is broad support for many of the park amenities suggested in the survey. Seven of the options received a response rate of 40% or greater. Nature themed amenities received the highest response rate of "Nature based Playground equipment" (51%); Natural Habitats or conservation areas and Wildlife viewing opportunities (47%). The next tier of amenities included "Access to water sports activities (44%) Public art or sculptures (43%), Outdoor performance spaces or stages (40%) and Sports fields or courts for emerging sports - pickleball, disc golf (40%).

Key Findings

- The public widely supports development of passive recreational spaces within existing and newly developed parks. The City should consider the inclusion of these features when planning future facilities.

- Nature based playground equipment is desirable by a large percentage of respondents. This indicates a need for this type of amenity within the park system. The city should evaluate where nature based equipment could be used in lieu of traditional playground structures, and otherwise work to improve access to natural areas for unprogrammed free play.

- The Public supports the inclusion of "the arts" within park and recreation spaces. Inclusion of sculptures, murals, and performative spaces are all welcome and should be considered as a potential amenity within existing or newly developed parks.

- Access to the River for water sports activities is broadly supported among respondents. The City should evaluate where these uses could be collocated with motorized boating facilities, or dedicated their own space within riverfront parks.

Stakeholder Group Findings

To seek input from important stakeholders in the community interviews were conducted over 2-days. City of De Pere staff provided a list of contacts, which were invited to attend one of three stakeholder meeting sessions. The respondents were then organized into groups based on need. (Civic organizations, youth sports organizations, and Institutional Partners). There was the following consensus around discussion topics among stakeholder groups.

- The Parks and Recreation system and its facilities are important for the community and their organizations objectives.
- Willingness to partner or continue to partner with the City on Parks and Recreation planning, funding/ fundraising, and promotion.
- Long term plans for growth and development of their organization underway, including capital projects the City can help with undertaking.
- Appreciation for being included in the discussion of the CORP and a desire to participate in additional/ regular meetings on topics of mutual interest.

Youth Athletics Organizations

Youth Athletics organizations were generally focused on serving their organizations individual recreation needs. Each club or organization reported that their numbers were growing and the need for additional sports fields or facility improvements were near on the horizon. Each organization said that they were in the process of fundraising for future facilities, and that they would welcome help in applying and preparing grants.

Discussion around park improvement wants and needs included the following:

- Optimist Park
    - Additional storage in the concessions area
    - ADA access needed between sports fields.

- Lighting the remainder of the fields would allow softball to extend their season or number of games and maximize use of the facilities
- Additional parking for larger events would be beneficial
- Batting cages
- Current project being undertaken to upgrade the scoreboards.
- Use of De Pere Highschool Fields currently, but need additional softball fields long term

- Southwest Park
  - Lighting the fields would allow soccer to extend their season and host more games at tournaments, etc.
  - Provide shaded areas either with structures or with additional tree planting
  - ADA paths or better access to the unprogrammed space to the south of the park. This area is currently used as a practice area, but bringing equipment over is difficult.
  - Expansion and/ or addition of restrooms to serve the fields on the south end of the park.
  - Long term vision is to convert the northwest field (1) into an artificial turf field. This would extend the use of the field and allow for heavier use.

Above: Aerial view of Southwest Park

- De Pere Ice Arena
  - Maintenance of the arena is costly and there is a need of repairs or upgrade of the ice.
    - Chiller system in need of work
    - Furnaces do not work

- Going from sand to a concrete surface would improve the facility use. Expansion of the user groups for the ice arena would help to maximize the value of spending the funds to improve.
  - Indoor Farmers Market
  - Roller Hockey
  - Special events

Civic Organizations

Civic organizations were generally focused on community promotion efforts, economic development, and business support and attraction. Each organization held large community events, which is the primary way they used City of De Pere Park and Recreation facilities. Voyageur Park was used almost exclusively, with periodic use of the De Pere Ice arena or Brown County Fairgrounds in the past.

When asked if **Voyageur Park** served their needs, the consensus answer was yes. Discussion around other park improvement wants and needs included the following:

- Storage for event materials on site. For example, powers strips, signage, fencing, etc. They currently use private storage and bring the event materials to the site.
- Electrical improvements to provide access to currently unserved areas throughout the park would improve flexibility of park use.
- Water access to the park would help visitors from the east side attend the events without needing to utilize the Claude Allouez Bridge.
- Trees planting should be planned rather than breaking up unprogrammed lawn space, which is needed for event setup.

Above: Aerial view of Voyageur Park

- Kayak Launch at the park would help to bring additional visitors to Voyageur and as a result to the City and downtown. Also support for this elsewhere in the Park system.
- Stormwater issues in the parking lot
- Picnic Tables along pathways that can be moved to storage if needed
- Small Performance Stage
- Public Art/Sculptures within Parks
- Improved or additional restrooms
- ADA improvements important to keep implementing.

When asked if there were any improvements or long term plans their organization had as initiatives the discussion shifted to the planning for Wells Park and George Street landing. Several of the members were part of previous charettes, or otherwise were familiar with the Downtown Master Plan and Cultural District Plan. They felt that these projects were transformative and that they should be priorities for the City. They stressed the importance of the connection from Downtown to Voyageur Park for their organization's objectives.

Institutional Partners

Institutional Partners represent the athletic departments for the City's school districts. They do not currently use any public facilities for their programming. The City does use their facilities for recreational classes and programming. Youth sports organizations also use their athletic fields in some cases regularly, in other cases for their larger events. The following facility needs were mentioned:

- Additional Baseball Fields on the East Side of the Fox River
- Softball Fields

The consensus was that with growing enrollment the need for additional sports facilities will be needed soon. This may also lead to loss of athletic fields as a result of school expansion in the short term, which may impact the availability of these facilities to youth athletic organizations. Discussion about the potential use of Jim Martin Park came up.

Existing Parks and Recreation Needs Assessment and Recommendations.

The outdoor recreation needs assessment and recommendations provide specific action items for most parks in the City of De Pere. The recommendations are prioritized into three (3) categories.

- High Priority: To be completed in the next 1 to 5 years
- Medium Priority: To be completed in the next 6 to 10 years
- Low Priority: To be completed in the next 11+ years

The priorities were based on several factors including meeting ADA standards, how often a facility is used, and condition of equipment. The complete list of park recommendations is outlined in **Appendix C**. These recommendations include general maintenance, facility upgrades, and long-range planning and highlight an estimated cost of improvements. There are also some observations worth noting that do not relate to specific parks but to the parks system. These recommendations should be broadly considered as part of the parks improvement program. These are outlined below.

Boat Landings

In the southern part of the City of De Pere, there is a lack of water access/boat launches. This part of the community is projected to experience the majority of future growth. The City of De Pere should consider exploring options for acquiring land or collaborating with the Town of Lawrence and Town of Rockland to identify suitable locations for future water access points.

The need for non-motorized boat launches/ landings was also specifically brought up during community stakeholder meetings as a way to attract users to the park system. The cultural district plan identifies Voyageur Park as a desired location this amenity, but these facilities should be considered alongside motorized boat access whenever making these improvements to any riverfront park.

Future Park Land

Many of the existing parks in the city have limited available land for new park facilities. Sports like baseball and soccer require larger areas to accommodate their needs. Therefore the City of De Pere may have to acquire larger tracts of land specifically dedicated for a sports complex, should demand for these activities grow.

Southern Bridge Connector Across the Fox River

The anticipated completion of the South Bridge Connector in 2029 will significantly enhance the accessibility of park facilities for residents residing in the southern region of De Pere. This bridge will serve as a vital link connecting park amenities on both sides of the Fox River. With the City's projected growth toward the south and the development of new park and recreation facilities, it is crucial for the City to prioritize projects that leverage this corridor. By establishing connections between existing and new facilities through the South Bridge Connector, the City can optimize the utilization and enjoyment of its park and recreation offerings for its expanding population.

Americans with Disability Act

The City of De Pere continues to prioritize accessibility in the City's Park and recreation system. In 2013 the city conducted an Accessibility Audit of its park facilities. Recommendations for specific improvements have been integrated within the plan.

Working with Other Groups and Governments

The City of De Pere has made efforts to make park planning an inclusive activity. Continuing to work with user groups and adjacent communities will make the park systems more efficient.

Catalytic Project Recommendations

The City of De Pere has several catalytic projects in the planning phase, or under construction, that incorporate City Parks. These projects are defined as catalytic because they not only serve the Parks and Recreation needs of the City of De Pere, but also serve as a regional draw establishing the City's Park system and the City as a premier destination. These projects also serve other City priorities as they relate to Downtown development, economic development, and revitalization. This plan recommends that the City continues planning efforts, specifically around the parklands of these projects, to ensure that a clear vision emerges for implementation and enhancement.

Wells Park, Front Street, George Street Landing

The prominence of Wells Park on the river and its proximity to the Mulva Cultural Center make it a major linking community asset with great potential. The Cultural District Plan and previously the Downtown Master Plan completes initial planning and visioning on the programming and development of the park, but to ensure that this vision is further evaluated and implementable a Wells Park Master Plan should be developed. This master plan should be done in conjunction or as a first phase to redevelop the riverfront at Front Street and eventual connection to Government Island via pedestrian bridge at the George Street Landing.

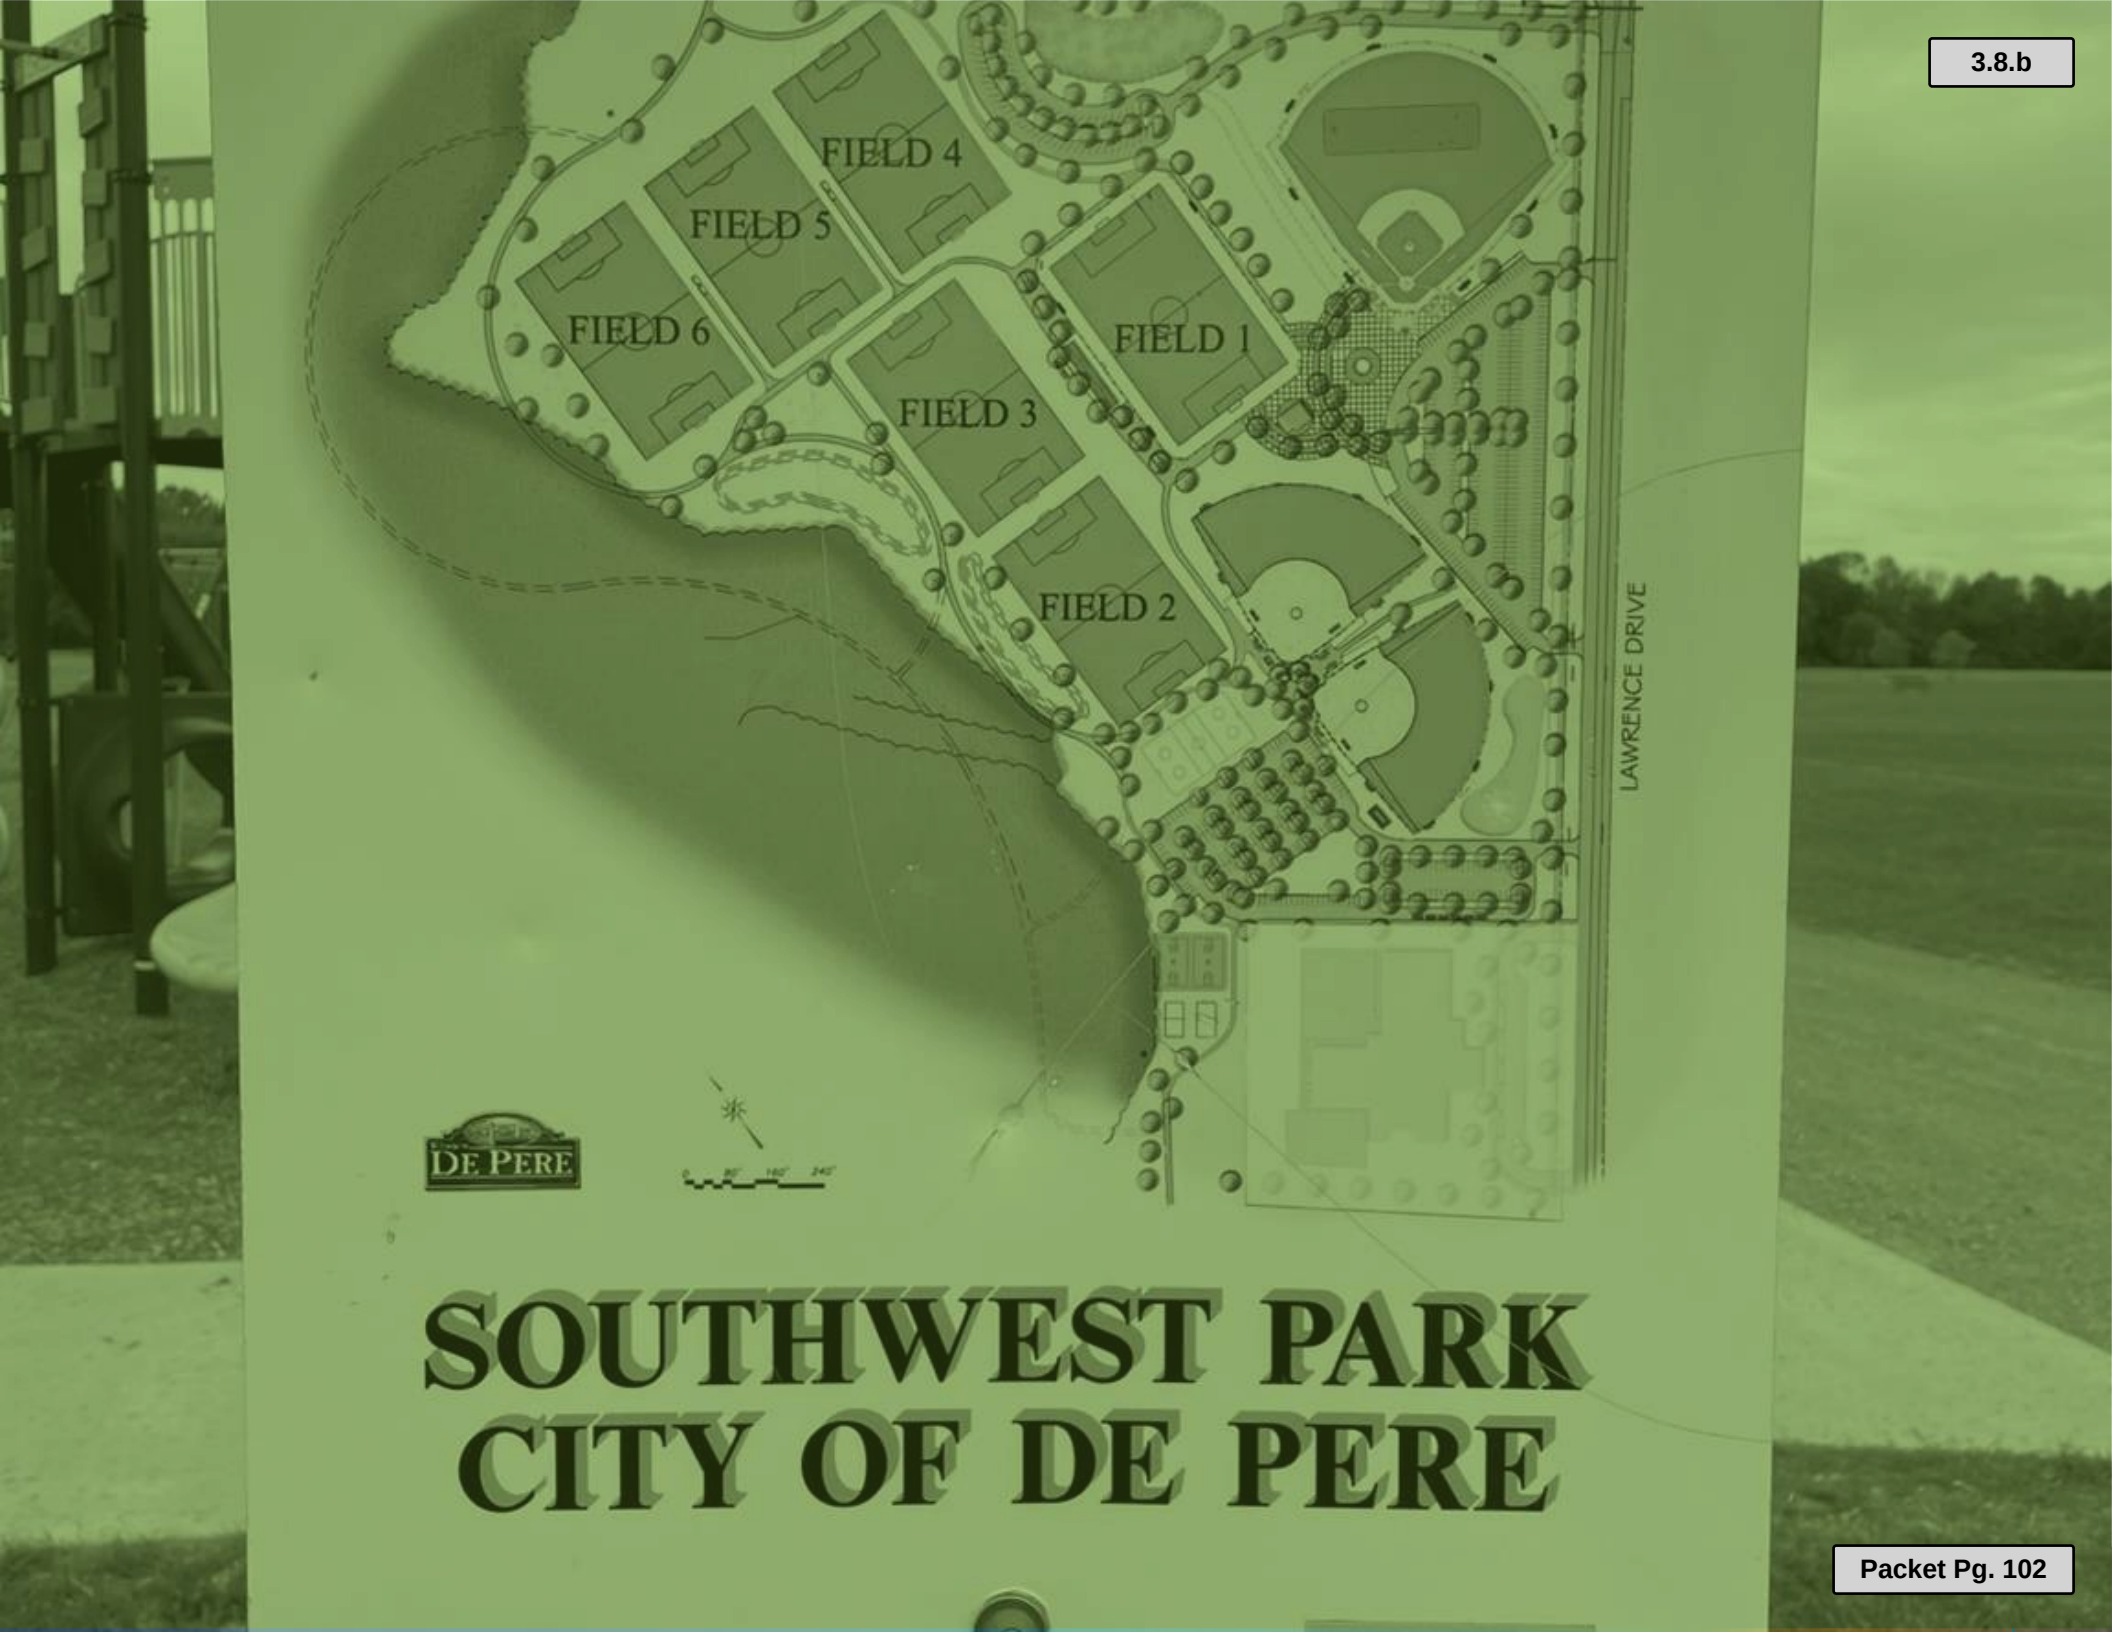

Above: Public realm concept of riverfront improvements in the Cultural District Plan. (Smith Group JJR)

Voyageur Park

Voyageur Park is the primary gathering and outdoor event space for the City of De Pere. It is the most visited and favorite park of Community Survey respondents. It serves as the community's most prominent access to the Fox River and draws visitors from across the state and beyond. Previous planning efforts have identified Voyageur for improvements to the boat launch to include a kayak launch and rental, and addition of an outdoor performance space. The feedback received from community stakeholder groups identified several other improvements that would allow for better use of the park for their organizations. To appropriately site and consider these improvements a Voyageur Park Master Plan should be conducted. This will ensure individual improvements do not impede on the park's current use and allow the park to remain flexible as a Community Park and community gathering space.

West Riverfront

The development of the Brown County Fairgrounds Master Plan and planning and visioning conducted with the Downtown Master Plan serve as initial planning towards improvements on the West Riverfront. The inclusion of a nature focused trail as suggested by these plans compliments the findings of the public involvement survey. A large majority felt that there was a need for passive natural recreation within the park system. This carries forward the recommendation to work with Brown County and Ashwaubenon on a master plan for the remainder of this area. The new shoreline park focused on environmental features and incorporating educational programming and facilities, habitat stabilization, and restoration efforts will provide a welcome compliment to the activity across the river at Voyageur Park.

SOUTHWEST PARK
CITY OF DE PERE

PROPOSED FUTURE PARK LOCATIONS

Several factors were considered to assess future park locations and classifications. First, the Comprehensive Outdoor Recreation Plans and Comprehensive Plans of surrounding communities were reviewed to identify the location of existing parks in each community and their plans for future parkland needs. Second, proposed residential growth areas were identified in the City of De Pere's Land Use chapter of its Comprehensive Plan. Third, the population and parkland projections indicating a growing population.

The City's Comprehensive Plan shows some residential growth is projected in the southwest portion of the City but more residential growth is projected in the southeast portion of the City. Town of Lawrence planning documents state an immediate need for a community or neighborhood park near the City of De Pere border. The Town of Rockland shows a proposed park location near the De Pere corporate boundary. Map 4 shows suggested locations and classifications of future parks. No future mini parks are indicated on the map. Mini-park amenities, typically designed for younger park users, can be incorporated into community and neighborhood parks.

Neighborhood Parks (N1, N2)

The dedication and eventual development of neighborhood parks results from the need to provide geographic access to neighborhood parks in new areas of the City. These parks are shown as N1 and N2 on the map.

Neighborhood Park 1 – This park will serve the area of the Humana Sports Complex, which will be converted to a multi-use development. Plans call for a mix of residential and commercial uses, including 55+ housing. To serve the new residents of the area, a neighborhood park should be developed.

Neighborhood Park 2 - This park will serves the area of anticipated future growth on the southeastern border of the City. With the construction of the Southern Bridge connector in 2029, it is anticipated that this area begin to develop within the plan horizon. The location indicated for the neighborhood park is not a precise parcel, but rather more generally shows the vicinity in which development may occur.

Community Parks (C1)

Building off the recommendations of previous CORPs and the City's comprehensive plan, a community park should be located on the southeast side of the City near Altmayer School. The expected need for additional athletic fields necessitates a large track of land for development.

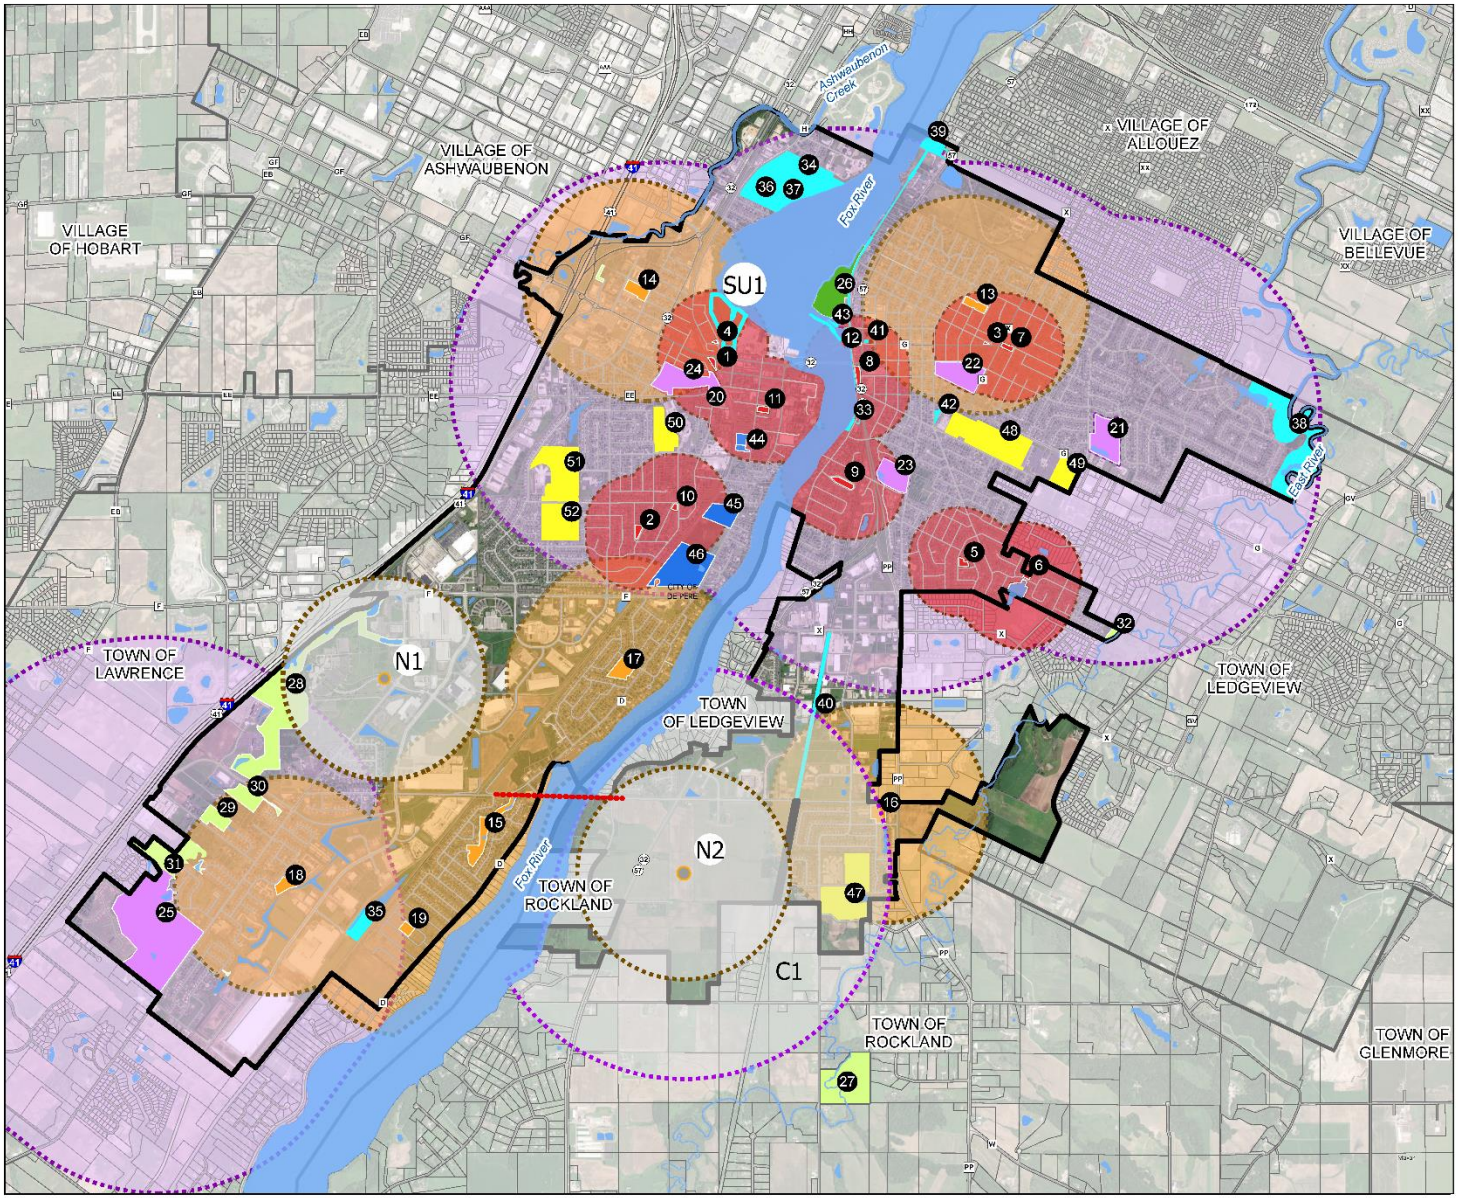

Like the neighborhood park in this area, the precise location is not shown, but rather a park should be developed within this service area. As the southern bridge is completed, it will be important to support connection between the east and west community parks via bicycle and pedestrian facilities.

Special Use Parks (SU1)

Building off the recommendations of previous CORPs, the City's Downtown Master Plan, and findings from the community survey, an environmental park should be developed on the west bank of the Fox River. This park will be focused on passive natural recreation, education, and be developed in conjunction with a trail ultimately connecting to the Ashwaubomay Memorial River Park and River Trail.

Capital Improvements Plan

The proposed park recommendations, priorities and related costs are organized as a Capital Improvement Plan for all existing parks in the City. The plan should be reviewed each year when the Park, Recreation and Forestry Department draft their yearly budget. The Capital Improvement Plan is found in at the end of **Appendix C** of the plan and incorporates all the recommendations in a table with estimated costs (CY 2023).

Parkland Dedication Policy

Most communities have parkland or open space dedication requirements in their municipal code for new development. The requirements specify how much land must be dedicated for parkland or open space. There is also an option to assess fees to the developer if the community does not need land for parks in the area being developed but needs capital to maintain or develop other parks.

Table 8 compares the City of De Pere's parkland or open space dedication requirements with other similar sized communities around the State of Wisconsin. To make an equal comparison, a "development" was created that contained 40 acres of land. The development provided 60 single family homes and 10 multi-family dwellings. The multi-family dwelling are 4-plexes with two bedrooms each. It is assumed that approximately 10% of the gross acreage will be used for public infrastructure such as streets and utilities.

Based on these criteria, the City of De Pere's policy provides the most fees that can be used for park acquisition and planning though the policy provides for less parkland acreage than the other communities. The National Recreation and Park Association recommends a minimum of five (5) acres of land for a community park.

The City's parkland/open space dedication requirements allow the fees in lieu of land to be used only for land acquisition and planning. The City may want to consider amending it ordinances to include:

- Allow fees collected to be used for park maintenance and/or the purchase of equipment.
- Increase the amount of land required for parkland/open space in new residential development.

A more detailed comparison of the parkland dedication requirements of the six (6) communities can be found in Appendix D.

Table 8 Parkland Dedication Requirements

Type of Dwelling	De Pere	Marshfield	Ashwaubenon	Menomonie	Stevens Point	Watertown
Single-Family	$18,000.00	$12,000.00	Based on Market Value of Land to be Dedicated	$24,000.00	$15,000.00	$30,360
4-Plexes		$6,000.00		$4,000.00	$4,000.00	$20,192
Multi-Family Bedrooms	$12,000.00	-		-	-	-
Total	**$30,000.00**	**$18,000.00**		**$28,000.00**	**$19,000.00**	**$50,552**
Required Acreage Dedication	1.58 acres	1.14 acres	2.2 acres	4 acres	5.6-8 acres	Determined by needs of subdivision

*Acreage dedication and fee amount based on a 40-acre residential subdivision with 60 single family homes and 10 4-plexes (2 bedrooms each). It is assumed that 10% of the gross acreage is for public infrastructure.

FUNDING SOURCES

To minimize the financial burden associated with land acquisition, park maintenance, and the development of new amenities or facilities, it is often necessary to seek grants or other external funding sources. Various state and federal agencies offer grants to support park and recreation projects, and there are also non-governmental agencies and organizations that provide assistance. In the City of De Pere, new residential developments are required to either dedicate land to the public or pay a fee that can be utilized for open space acquisition or the development of park and open space plans. Assistance can come in the form of grants, donations, or in-kind services. It's important to note that many grants have specific deadlines and may require matching funds from the community. The Wisconsin Department of Natural Resources' Knowles-Nelson Stewardship Program and the Wisconsin Department of Transportation's Transportation Alternatives Program are commonly utilized programs for park, bicycle, and pedestrian infrastructure projects.

Appendix E presents a list of options that the City can explore when researching funding opportunities for park and recreation-related initiatives. It's essential to keep in mind that program parameters and deadlines may change on an annual basis. By exploring these funding sources and leveraging available programs, the City of De Pere can obtain the necessary financial support to implement and enhance park and recreation projects, benefiting the community and promoting the development of quality recreational spaces.

44	Honestly, we homeschool our kids so we have the ability to go to parks during the day which is great! However, when we got to parks during the summer and when other children are out of school we encounter a lot of bad behavior and language that we do not want our family around. When we do go to parks, we spend some time doing park clean up of trash and other items. The park closest to our house (Rainbow Park) has a lot of areas that are rusty and our children and others have gotten cut by the sharp edges. We enjoy parks but children need more unstructured play and exploration. I wish there were some parks that weren't the big, expensive, limited play equipment but were made of logs, things to climb, build, maybe even a treehouse.	6/25/2023 9:11 AM
45	No sidewalks available all down Lawrence Road	6/23/2023 11:34 AM
46	Don’t offer a lot of things to do - trails, hiking	6/22/2023 7:40 PM
47	I use them	6/22/2023 12:40 PM
48	Too hot and playground not shaded	6/22/2023 11:11 AM
49	Kids at some of these parks are horrible. Swearing at other kids and adults and making fun of my autistic son. Kids vandalizing and spitting on playground equipment	6/22/2023 11:05 AM
50	Some of the kids at the sledding hill by the VFW are getting out of control. People are disrespectful of the neighboring property	6/22/2023 9:34 AM

Q16 Are there any parks in De Pere that you dislike or think could be improved? If so, please explain why:

1	Braisher Park has space and is nice but think there is room to do more in that location especially with events or activities.	8/18/2023 9:18 PM
2	No but please add a splash pad somewhere so we dont have to go to tank park	8/18/2023 2:45 PM
3	Roatary needs more tables and benches on the concrete slab	8/2/2023 1:42 PM
4	No	8/2/2023 9:30 AM
5	Improve water drainage and trails (mulch more) at DePere dog park	8/1/2023 7:36 PM
6	Pets should be allowed	8/1/2023 4:13 PM
7	East River trail has become too overgrown, don't feel safe	8/1/2023 12:57 PM
8	disc golf course at southwest. More effort to ice skating improvements.	8/1/2023 12:47 PM
9	The preserve trails by Humana need maintenance, especially the wooden bridges have lots of rotten boards. We don't use the trails as much as we used to for that reason, feels unsafe. Also Samantha park could use maintenance as well. I see they put in a cement sidewalk that leads up to the playground equipment which was much needed, but feel more upkept by way of replacing damaged equipment, weed/thorn control - hard to play in the grassy areas with so many pickers.	8/1/2023 12:14 PM
10	Legion play equipment for older kids.	7/30/2023 8:31 AM
11	No	7/28/2023 3:42 PM
12	Nopes	7/23/2023 8:09 PM
13	Brashier & Legion Parks: Open portions of them up to dog walking	7/22/2023 3:38 PM
14	Optimist park was kind of dirty when we were there but it was also very busy.	7/21/2023 5:45 PM
15	Nope	7/21/2023 8:15 AM
16	More Shade over the playground equipment.	7/18/2023 6:03 PM
17	Southwest park needs to offer more. Things like splash pads, skate parks, things for teens to do, etc.	7/18/2023 11:45 AM
18	Splash pad at a park with parking	7/18/2023 12:55 AM
19	Legion Park (Webster Ave) could be updated	7/17/2023 8:19 PM
20	Southwest should have tennis courts & pickleball courts. Needs a water pad.	7/17/2023 5:12 PM
21	No.	7/17/2023 2:29 PM
22	Legion park!!!! The playground equipment has nothing for littles and the slide is dangerous! No sides!	7/17/2023 2:08 PM
23	VFW park could really use new basketball court/hoops. Everything else has been upgraded but this area.	7/17/2023 1:31 PM
24	Near our area!!!!	7/17/2023 12:53 PM
25	Bicycle accessibility and walkability would really expand our park reach.	7/13/2023 6:03 PM
26	The new aquatic center should be larger with more room for lap swimming with hours 8am-9pm & run like any other business with guards having breaks & lunches, not opening at 1pm or	7/13/2023 4:38 PM

	closing for dinner & offering basic lifesaving skills.	
27	Dickinson elementary, old equipment and they have so many children it should be nicer and newer	7/13/2023 1:47 PM
28	N/A	7/12/2023 8:28 PM
29	Years ago we were informed Rainbow Park would be getting new playground equipment. To date we still have the original equipment minus some things that broke. When is going to be looked into?	7/12/2023 5:21 PM
30	Willems- old equipment, carney (old and rusty equipment)	7/11/2023 3:09 PM
31	All parks should have dog bag/poop receptacles	7/11/2023 12:14 PM
32	Wilson Park - no place to sit, rarely mown, dead and diseased trees,neglected	7/10/2023 5:50 PM
33	Let me start by saying that most of the parks seem to be kept up. But there are two in my own experience that jump out at me as needing attention. The Legion pool facilities are flat out disgusting. They need to be completely redone and kept up. Our kids play soccer at Southwest Park. The soccer fields are the worst kept out of all the cities we play in. The grass was long for more than half of our games this spring/summer. When it was finally mowed, the fields were covered in very long trimmings that made the game difficult to play. Visiting parents from Howard, Appleton, Oshkosh, etc., often comment on the lack of care shown to the soccer fields at Southwest. We wish we could take pride in these being our home fields, but they are not kept up at all. Don't know whose job it is to paint the lines on the fields, but those were also nonexistent for much of the year.	7/10/2023 12:18 PM
34	I think Voyageur could be improved even more and made a "center piece" of the city. The new restrooms will help, but perhaps add some sculptures among the trees near the playground as well? Improving the trail along the river would also be nice. Otherwise, a few parks could use some updated or expanded playground equipment. Overall, though, the parks are great.	7/6/2023 10:39 AM
35	N/A	7/6/2023 8:11 AM
36	Add a kayak rental at bomier launch	7/6/2023 7:32 AM
37	Jim Martin is closest to my house but the basketball courts are not good.	7/5/2023 2:24 PM
38	Overall I'm pretty happy with the parks that I've used. The grass at the dog park could be cut a little more frequently, but otherwise I have no complaints.	7/5/2023 10:58 AM
39	Not able to answer; don’t visit many of the other parks.	7/4/2023 4:50 PM
40	I recommend more natural flower beds in the parks (like the planting by the lock bridge? and a splash pad or two. Maybe some water stations on the fox trail	7/4/2023 7:23 AM
41	Legion needs more to do	7/3/2023 3:54 PM
42	Would really love to see lights at tennis courts so we can play at dusk/dark when the weather is a bit cooler.	7/3/2023 2:09 PM
43	Improved upon only by enforcing no dogs allowed. I don’t care for dogs, especially when they run or jump on strangers. I’ve seen them in Patriot park when there are DP park Dept people there and nothing is done to discourage the owners from bringing their dogs.	7/3/2023 11:48 AM
44	Parks need inclusive playgrounds that include music and sand	7/3/2023 8:46 AM
45	Not dislike by any means but it would be very neat if there were other items beyond a slide and swings at the smaller parks.	7/3/2023 8:20 AM
46	Kiwanis	7/3/2023 8:13 AM
47	Would love to see better playground equipment at Legion Park especially with the pool being right there	7/3/2023 6:36 AM
48	Optimist Park is really just meant for baseball. Not particularly nice and not many trees or leisure areas or nice views.	7/2/2023 11:04 PM
49	Legion Park needs to upgrade their children's pool	7/2/2023 10:10 PM
50	Allow pets. Stop punishing responsible pet owners because of a few jerks	7/2/2023 9:56 PM

51	Rusk park. Not really much of a park	7/2/2023 9:51 PM
52	I think more parks should allow leashed dogs.	7/2/2023 7:14 PM
53	Yes! Several of the little neighborhood parks are outdated and small. No bathrooms. For example: rainbow park.	7/2/2023 6:47 PM
54	The southwest park is rarely used. Bathrooms are not opened and woul love to see some adult activities out there	7/2/2023 6:03 PM
55	The smaller Parks in neighborhoods could be updated more.	7/2/2023 5:27 PM
56	We love Southwest park. It's in walking distance. Really wish it had a basketball court and in the winter an ice rink!	7/2/2023 11:20 AM
57	Kiwanis Park needs updated play equipment for the children in our neighborhood.	7/2/2023 9:51 AM
58	Legion Pool would be nice for an upgrade there	7/2/2023 9:17 AM
59	Kiwanis could use a playground equipment update.	7/1/2023 11:36 PM
60	De Pere Ice Arena should be at the top of the list	7/1/2023 6:38 PM
61	Trash and recycling year round helps keep the neighborhood clean	7/1/2023 2:47 PM
62	A lot of dead trees in vorager& bathrooms were disgusting	7/1/2023 9:38 AM
63	Jim Martin needs to have benches or some sort of seating added.	7/1/2023 8:44 AM
64	Any park that is surrounded by neighborhood should be updated to get the most community use out of them. Pavilions, benches, etc.	7/1/2023 8:19 AM
65	Continue to transition away from wood chips	7/1/2023 7:28 AM
66	There should be a park closer to the residents in low income apartments on scheuring. I see the kids playing a lot in the parking lot without much to do.	7/1/2023 6:19 AM
67	Would love some sort of walking trail at Southwest Park. It’s so large, but to walk without getting rocks in your shoes. The back of the park by the tree line would be amazing to walk with a stroller or ride a bike with the kids.	6/30/2023 9:50 PM
68	Brashier Park needs a new basketball court, but even more-so basketball hoops. There are people playing basketball there almost daily, but the equipment is run down.	6/30/2023 9:32 PM
69	Carney and Willems park could be updated, especially the equipment in Carney park	6/30/2023 5:27 PM
70	keep voyageur park alone	6/30/2023 3:55 PM
71	No	6/30/2023 3:36 PM
72	Soccer people should pick up after themselves. Sometimes when I walk in southwest park I fill a plastic grocery bag with their leftover garbage.	6/30/2023 3:29 PM
73	Lion's Trailside is very close to our house and the kids love the sledding hill. It would be great if there was more to do there (playground, picnic tables, etc)	6/30/2023 2:54 PM
74	Would love to see the east river trail plowed in winter or possibly some bubble mirrors to help with the blind spots on turns.	6/30/2023 1:31 PM
75	Love kiwanis park location, hoping for updated playground equipment. Looking forward to future park possibly in new subdivision development. Park by St. Norbert is lacking but I believe improvements are coming soon	6/30/2023 11:56 AM
76	Kiwanis equipment is aging but we love it. With the neighborhood expanding it’d be nice to see some updates to the equipment, but I know it’s a small park.	6/30/2023 11:25 AM
77	none	6/30/2023 11:08 AM
78	Southwest park would be great to offer mote things like splash pads, maybe a skate park, and a sledding hill.	6/30/2023 10:51 AM
79	I don't like it when young people and adults fish where they are not allowed to fish at Voyageur park, in the fish refuge area...they are a bunch of smart mouthed jerks!	6/30/2023 10:04 AM

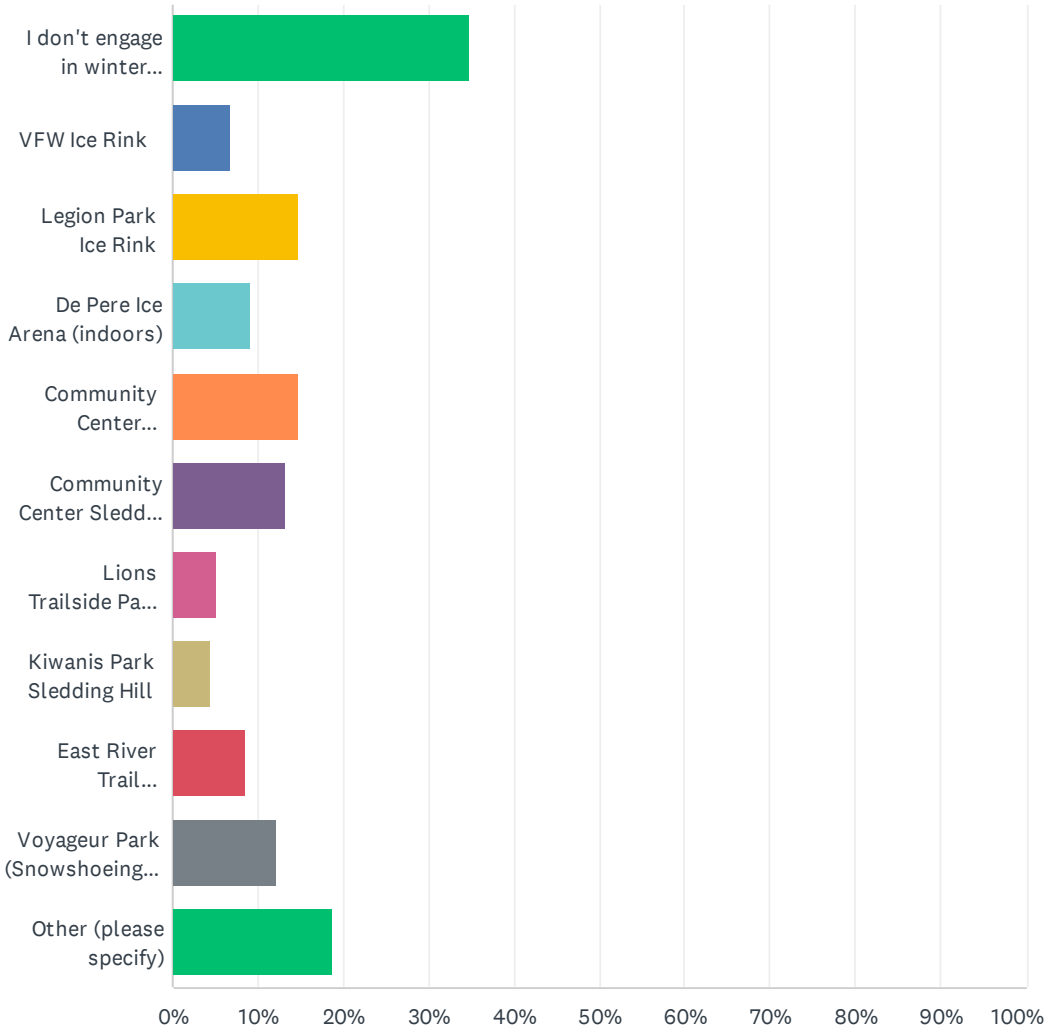

80	Wilson Park, old and not welcoming. The aesthetics are unkept and not appealing.	6/30/2023 10:03 AM
81	more benches with shade by the playgrounds	6/29/2023 11:37 AM
82	The playground equipment at Legion Park is aging and the newer equipment is only geared at older age levels.	6/28/2023 4:04 PM
83	VFW- basketball court!	6/28/2023 1:17 PM
84	Some equipment too high, not enough equipment for toddlers, We want splash pads! The new aquatic center is too packed!	6/28/2023 10:29 AM
85	N/A	6/28/2023 9:03 AM
86	Optimist (I Know you can't fix this), but it seems like there is damage to the playground area from people that live by or visit that area. Dickinson Elementary School playground could be improved. Rusk Park- it would be nice for people in that area to just put a small playground set. How about a place close to downtown with a splash pad or a splash pad at a park?	6/28/2023 8:12 AM
87	In general, please continue to plant trees, especially with losing so many due to EAB. The shade is so helpful and the trees yield so much beauty beyond shade. Please continue to plant trees!	6/27/2023 11:25 PM
88	The lawns at most of the parks could be better kept up on such as mowing. Voyageur park is way too busy and also there are always teenagers using/sitting on/loitering on playground equipment that is meant for younger children	6/27/2023 11:16 PM
89	Wilson Park!	6/27/2023 10:14 PM
90	N9	6/27/2023 10:03 PM
91	Designated gravel paths for dogs That way it can be apart from people Who do not liked dogs yet I can bring my leashed dog	6/27/2023 8:26 PM
92	No	6/27/2023 8:11 PM
93	Update the pool and building at Legion	6/27/2023 8:04 PM

97	Kiwanis!	6/27/2023 6:52 PM
98	Jim Martin park doesn’t feel safe.	6/27/2023 6:44 PM
99	VFW park	6/27/2023 3:31 PM
100	Willems Park on 4th has been neglected far too long. Please keep as a green space and welcoming for residents to sit and relax. Preferably dog free.	6/27/2023 3:30 PM
101	No	6/27/2023 3:17 PM
102	I want to see the green space at Voyageur Park maintained for everyone’s use - I do not want to see buildings and large events there.	6/27/2023 3:17 PM
103	No	6/27/2023 3:06 PM
104	Legion park could use an upgrade on playground equipment currently two areas	6/27/2023 3:02 PM
105	Legion. The upper is too small and outdated and the lower is made for much bigger kids	6/27/2023 2:42 PM
106	Fox Point Boat launch should be open year round for trail users, especially now that the trail is cleared all winter.	6/27/2023 1:40 PM
107	I would love if a splash pad could be at a De Pere park.	6/25/2023 8:56 PM
108	Kiwanis has had the same equipment for many years. Something new on the playground would be nice. Also, the berm by the parking lot needs attention. I saw like 5 dead bushes.	6/25/2023 8:51 PM
109	Braiser for a better shelter for the parkees/kids	6/25/2023 10:51 AM

110	As noted above, Rainbow Park has many edges that are sharp and some rusty. Even on the metal benches there are some sharp edges. This is a small neighborhood park with a great field and it would be a great place for some new equipment incorporating nature as well. We do a lot of get togethers as a neighborhood in the field and park. We are blessed with such a great field space! The lack of mulch is often an issue there as bees make their way underground in the open dirt areas. This park is frequently used by many and it would be great if it was cleaned up a bit. Maybe even a gaga ball pit! A climbing apparatus (like the big spider webs)	6/25/2023 9:11 AM
111	Lack of enough shade or sheltered space at parks with athletic fields or playgrounds.	6/25/2023 5:22 AM
112	Samantha park could use improvement (very outdated, minimal equipment). Southwest park could use an addition since the area is being built up so large.	6/25/2023 12:36 AM
113	All parks-planting areas of native forbs and grasses. Plant only native trees.	6/24/2023 3:14 PM
114	It would be nice if dogs were allowed in more	6/24/2023 1:57 PM
115	There needs to be safer ways to access some of the parks with bike paths, etc.	6/24/2023 1:53 PM
116	Legion pool needs an update	6/24/2023 2:15 AM
117	Rainbow park could use some updated equipment	6/23/2023 5:21 PM
118	Rusk is pretty limited	6/23/2023 3:37 PM
119	The equipment at carney park is worn down. We like going there because my boys can ride their bikes there and there is shade. But its close to the westwood so if its not too hot and sunny, we just go to the school playground because the equipment is better. It would be nice for families with young children to use during the day when they can't use the school playground if the place was updated.	6/23/2023 3:22 PM
120	It would be wonderful if more shade and benches could be added to the parks overall. We frequently visit Jim Martin and our experience would be greatly improved by a shaded area with benches or tables	6/23/2023 2:13 PM
121	Voyager park, add toilets and drinking water access	6/23/2023 8:08 AM
122	I had no idea there were so many parks in De Pere - I am only aware of a few. I can't think of any improvements on the ones I know about.	6/23/2023 7:21 AM
123	NA	6/22/2023 11:43 PM
124	Carney Park!!! There is plenty of space. You have a tiny slide and monkey bars. That makes one item for small kids and one item for a big kid. Many people do the park laps in this area multiple times a week (carney, Willems, OLOL, and Westwood). It would be nice to have the water issues at Willems fixed and the equipment at carney fixes.	6/22/2023 10:03 PM
125	The park on Outward could use fixing up. So could the park by the college with just the swings.	6/22/2023 8:20 PM
126	Toilet facilities with diaper changing stations, more places to take dogs	6/22/2023 7:43 PM
127	More trees in the field by Rainbow Park would be nice	6/22/2023 6:51 PM
128	I think there needs to be a park that has more nature based equipment. We love the section at the botanical gardens that has logs for balance, stepping stones etc.	6/22/2023 5:30 PM
129	Fox River Trail - could shovel further south on the trail. We were walking in the spring and had to turn back because the trail wasn't plowed.	6/22/2023 4:22 PM
130	Legion pool is due for an update	6/22/2023 3:14 PM
131	I wish the sledding hills had some amenities like bathrooms	6/22/2023 2:11 PM
132	Optimist park softball fields need improvement.	6/22/2023 12:40 PM
133	Would be great to have a splash pad at a park or wading pool.	6/22/2023 11:21 AM
134	Not enough shade at the playground.	6/22/2023 11:11 AM
135	We need more water options, like splash pads and pools…especially on the East side!!!	6/22/2023 11:05 AM

136	Continue to circulate police presence to keep parks positive, safe and respected	6/22/2023 10:44 AM
137	A band shell for the De Pere City Band at Voyageur Park would be nice.	6/22/2023 10:06 AM
138	We should have public rain barrels, and compost containers in all city parks	6/22/2023 10:01 AM
139	picnic tables and benches at parks, especially those with playgrounds (Jim Martin)	6/22/2023 9:49 AM
140	I would like a dog area on the east side	6/22/2023 9:11 AM

When my kids were little (2-4) I would see all these programs for their age group but signing up for it was never an option because my husband and I work full time. It would have been nice to have something engaging to do with them after work before/after dinner. So-more focus on parents of toddler/preschool where both parents work full time day jobs.	6/22/2023 8:20 PM

I don't know if I would walk alone on the fox river trail and definitely not on the trail on the east side where the woman was attacked. I don't know if the city really addressed that and what women in particular should do about using the trails. I felt like the city could have done more to make people feel safe again. 34	Thank you for having the tree program between sidewalk and street on people's properties!	6/29/2023 11:40 AM
35	Street trees need to be taken care of more often. Many do not get trimmed and are dying.	6/28/2023 4:07 PM
36	I know they are messier but fruit and flower bearing trees are so important on decreasing seasonal allergies. Also lack of trees has been a decision maker in not purchasing a home.	6/28/2023 4:59 AM
37	I am concerned that the rate of trees being removed is much lower than the rate of trees being replanted. There are MANY areas where there are not trees between the sidewalks and roads. I think that there needs to be more communication about the tree planting program AND an easier way to get the trees. For example, please make it possible for it all to be done online without having to submit a paper order order and physical payment. In addition, perhaps have a program where trees can be bought by residents at lower costs or a buy one get one free incentive to help residents plant more trees. If a program is in place like this, having it marketed so people are aware of this is vital so that they take advantage of it.	6/27/2023 11:32 PM

38	When I wanted street trees planted on the parkway the city parks superintendent insisted on the city staff planting the trees and would not let us plant them. We understood we had to pick a tree that was on the approved list but they were planted by the city. Some were planted too high. And of course we still had to water them and pay for them even though they are city trees.	6/27/2023 11:25 PM

	to jump start more tree planting in the city?	
17	Cherry or plum trees (edible) would be nice	6/27/2023 9:07 PM
18	Absolutely. I think the giving the residents the option to not replace a tree in their terrace is wrong; the precedent should be that the city puts trees and the look of our streets and neighborhoods first. Trees are a valuable asset to our community and individuals should not be able to make a choice that impacts the look of their entire neighborhood. They can do whatever they want with the trees in their yards, but the terrace should look uniform throughout the city.	6/27/2023 1:55 PM

#	IF YOU SELECTED "POOR", PLEASE SPECIFY WHICH PARK(S) HAVE ACCESSIBILITY ISSUES AND DESCRIBE THE MAIN DIFFICULTIES YOU ENCOUNTER:	DATE
1	Would love a compost site on the SW side of town - driving over the De Pere bridge to get to SE side is a hassle and a half so we don't use the compost site services as much as we should.	8/1/2023 12:14 PM
2	Getting from east de pere to west is some what difficult because it it so busy and there is no room to bike.	7/29/2023 12:51 PM
3	We do not have any within walking distance, living on honeysuckle	7/17/2023 12:56 PM
4	I wish when you redid VFW ypu would have added 2 seperate driveway lanes	6/22/2023 9:40 AM

Q27 Is there one thing that would encourage you to visit De Pere parks more often?

Answered: 131 Skipped: 250

#	RESPONSES	DATE
1	If there was more access to facilities in the colder months like use of bathrooms at the parks. We still go play at the park in the winter. Would be awesome if there were some other events in winter months to bring people out to socialize too.	8/18/2023 9:33 PM
2	Splash pad, shade, picnic tables	8/18/2023 2:51 PM
3	More shade, more picnic benches	8/2/2023 2:34 PM
4	Nicer workers	8/2/2023 2:00 PM
5	No	8/2/2023 9:38 AM

39	Kayak rental at bomber launch	7/6/2023 7:36 AM
40	It took me several years to realize that we had outdoor ice rinks. I drive past Legion Park on Webster all the time and I didn't know there was an ice rink there. Now, I'm often hesitant to take my kids because I don't know when they're ready or how the weather affects their condition. More frequent communication about their condition would be nice. It would work for me if that was done on social media, but I've also thought that a sign on Webster would be nice. I've also thought that moving the ice rinks to the Shopko parking lot would be great.	7/5/2023 7:04 AM
41	NOTE: I was unable to navigate the two questions where I was to rank the items. That part of this questionnaire is not user friendly!	7/4/2023 4:58 PM

#	RESPONSES	DATE
1	We are very concerned with bridge installation and impact to Fox River Trail and safe, accessibility from Green Leaf into downtown De Pere	9/10/2023 9:37 AM
2	We love the parks! We love that we live in the city but have access to all these great areas to bike ride, play, and explore nature close to home.	8/18/2023 9:33 PM
3	Splash pad pleeeeeaaaase!! More poured surface playgrounds for disabled access	8/18/2023 2:51 PM
4	do you offer or coordinate spring or fall clean up events at our community parks?	8/5/2023 11:24 AM
5	More kayak launch points on the river would be great	8/5/2023 11:22 AM
6	Parks are important to a city—particularly if they are well-maintained and allow all residents to use them	8/1/2023 2:19 PM
7	Kayak launch should have no fee. We usually launch in Allouez or Green Bay.	7/30/2023 8:42 AM
8	Please look into maintaining the ice in the rink during the winter. It gets flooded and is good for a week and then it's all ruined and dangerous!! I know so many kids who would love to use the ice all winter but it not maintained!	7/23/2023 8:14 PM
9	Love living in De Pere and really appreciate the great work done by the Parks, Rec and Forestry personnel!	7/22/2023 3:47 PM
10	We love to call De Pere our home and love the playgrounds for our children.	7/21/2023 8:21 AM
11	Generally, all the parks in Depere need to be checked for loose bolts, missing hardware and so on. The rubber type surfaces are nice but get very hot. I think I can go to most parks and find something small that should be repaired. I would suspect that some of it could be wear and tear or light vandalism. Overall the parks are well maintained and well planned out.	7/20/2023 8:40 PM
12	It would be really great if the city of De Pere had rental equipment for use on the River such as paddle boards, Lilly pads, etc.	7/20/2023 11:39 AM
13	We enjoy the playground equipment and would love to see continual improvements in those facilities.	7/20/2023 7:49 AM
14	There are no walking parks in the honeysuckle area	7/17/2023 12:56 PM
15	We're good!	7/13/2023 4:47 PM
16	De Pere is a great community and its parks is one of the main reasons. There are a lot of communities in the area that prefer lower taxes to greater and higher quality services. We are really happy that De Pere tends to focus on the latter--this makes it unique in the area and a great place to live and raise a family.	7/6/2023 10:50 AM
17	I love dogs but some dog owners don't pick up after their dog and allow their dogs to be too close to kids they aren't familiar with.	7/5/2023 7:50 PM
18	See my answer about rating - unable to navigate that portion of this questionnaire!	7/4/2023 4:58 PM
19	Everyone is doing a great job, the parks look better and better- thank you!! I appreciate this opportunity to share ideas toward the future plan. Good luck!	7/4/2023 7:35 AM
20	Do something about the parking at Optimist! It's terrible during softball. I live on Coral st and people take our parking and are rude to us.	7/3/2023 3:01 PM
21	LOVE LOVE LOVE the flowers and birdhouses in planter areas dow town. So unique and looks summery and beautiful!	7/3/2023 2:34 PM

22	Thanks!	7/3/2023 10:05 AM
23	Thanks for seeking feedback.	7/3/2023 8:37 AM
24	The parks in DePere are the best. When our children were young we used many more facilities than we do now. We appreciate how well kept everything is.	7/2/2023 9:10 AM
25	Great parks and impressed with the city staff that help make it possible.	7/1/2023 11:53 AM
26	Community Fundraisers such as a DPPD K9 Fundraiser would draw in a crowd, would also really love to see more live music.	7/1/2023 8:31 AM
27	Voyageaur park could use a restroom right by the playground.	7/1/2023 7:50 AM
28	Smarter use of funds. Although VFW aquatic center is beautiful, it is frustrating that such a facility was built and is of no use for the majority of the year 🤦‍♀️	7/1/2023 7:10 AM
29	I wish our street had a sidewalk so it was easier to walk safely to the park. We're a little side street and don't have a sidewalk.	7/1/2023 6:23 AM
30	Woodchips stink as playground flooring! Thank you to all those who work so hard to keep our city looking amazing!	6/30/2023 9:59 PM
31	Would love to see continued growth encouraging and embracing eclectic and diverse activities that compliment the cities current offerings!	6/30/2023 9:42 PM
32	It would be nice if the park and rec dept could sponsor baseball and soccer games like appleton park and rec does and like they already do with flag football--something that is less intense and more family friendly than the current programs. Overall the parks are wonderful and the city is really well kept!!	6/30/2023 5:40 PM
33	You do a great job. I just wish there was a spot I could shoot my bow. Also, the mobile lights at Southwest park are ridiculously bright and shouldn't be used. If any lights are used, they should be required to face down like a parking lot.	6/30/2023 3:36 PM
34	We love De Pere so far! We moved here during COVID so it was hard to feel welcomed into the neighborhood. But hoping to meet new people this summer at events!	6/30/2023 1:36 PM
35	I liked the park highlights shared and would like to see more info and more frequent highlights shared to learn more about what DP offers. Thank you for all you provide and all you do.	6/30/2023 12:10 PM
36	Thanks for all you do!	6/29/2023 11:44 AM
37	Please consider splash pads, as the pools are too full! Please allow toddlers use of baby pool in the morning while swim lessons are in session! Neenah parks have Ziplines, which my kids love!	6/28/2023 10:38 AM
38	Great job. Keep doing what you do for the community!	6/28/2023 8:19 AM
39	I'm very pleased with De Pere parks and it's part of why we love living here. I need to take more time to educate myself on everything that is offered.	6/28/2023 5:01 AM
40	I am thankful to live in a city that care about our parks and forest. Let's keep up the great work and keep making improvements. Thank you!	6/27/2023 11:35 PM
41	The terraces/parkways/boulevards on Ridgeway are terrible. I understand there has been construction on the street for sometime. However over the past six years that I have lived in De Pere, whether there is construction or not on ridgeway, the grass always looks terrible and is not cut regularly, the trees are randomly planted, some are in bad shape, and it is overall not aesthetically appealing, and they hardly trim the edges and around the trees. It's a true eye sore and should be maintained better.	6/27/2023 11:31 PM
42	I believe the parks, arborist and general maintenance is fantastic. Trees should be required in rows. The should be free and food producing. Dogs should be permitted in parks as they are part of the family and of our community. So much ah the for depr had a dog	6/27/2023 10:11 PM
43	Very friendly and safe Love the lights at pickle ball at legion	6/27/2023 8:30 PM
44	Add on to the fox river bike trail (example connect it to Lombardi Avenue)	6/27/2023 6:54 PM
45	Doin a great job folks, thank you all!	6/27/2023 6:50 PM

46	Please maintain the green spaces in the downtown area!	6/27/2023 3:21 PM
47	Overall De Pere's parks and number of parks is outstanding!	6/27/2023 3:11 PM
48	I think the entire parks and rec program in De Pere is the crown jewel of what our taxes fund. We use the parks and the programming all the time. I think everything is executed well and I think staff is very responsive when it comes to any changes or suggestions made. I'm constantly impressed with the offerings, the quality of programming, and the new ideas your department brings about. Keep up the great work!	6/27/2023 2:03 PM
49	We are thankful to live in De Pere! We enjoy the pools, trails and other amenities!	6/25/2023 9:25 AM
50	Highly recommend updating / adding additional parks in the southwest region of depere as it has grown significantly. Additionally a FREE splash pad would draw so many people to parks as there is not currently any in depere.	6/25/2023 12:41 AM
51	Overall Great job on the Parks. Just what I said above for SouthWest, there is soooo much potential over here at that park! And extend the street tree program to all. And Buy trees from a better quality supplier!!!	6/24/2023 9:19 PM
52	With how crazy traffic and speeding has been lately it would be nice to create more bike lanes and safe routes to and around our parks.	6/24/2023 5:47 PM
53	When trees are planted they need to do a better job prepping the roots I.e. cut off roots that are wrapping around root ball, loosening soil in the root ball. Plant only natives, provide better outreach for invasive pests. Have actual program where they take care of invasive pests. Stop planting annual plants and wasting water and employee time by watering them.	6/24/2023 3:20 PM
54	Thank you for already providing amazing services!	6/23/2023 2:18 PM
55	De Pere is a beautiful place to live ... keep up the good work!	6/23/2023 7:27 AM
56	Overall I'm happy with the parks of West De Pere and De Pere	6/22/2023 8:33 PM
57	I'm very disappointed baby pools have been taken away during swim lessons. That was a big advantage to be able to watch my older child and occupy my younger child. It will definitely influence my decision on doing more sessions during the summer.	6/22/2023 7:24 PM
58	All De Pere parks should be dog friendly as De Pere likes to boast about how dog friendly the city is.	6/22/2023 10:49 AM
59	You should allow dogs in parks but at the 1st violation that persons animal should be banned.	6/22/2023 9:40 AM

Wilson Park

Mini-Park — 1.03 Acres

Wilson Park is located on the corner of College Avenue and 4th Street. The park is near St. Norbert College and sees activity from both college students who live nearby and other community residents. Wilson Park currently contains a park sign, memorial tree, swing sets, picnic table and trash receptacle, a monument to President Lincoln's Gettysburg Address, one light for security and a chain line fence on a portion of the southeast property line.

A Master Plan for refurbishing the park was completed in 2023. The Master Plan proposes a passive approach to programming with a crushed granite garden path which winds through the space and around a centrally located garden featuring the relocated Lincoln Monument. The park is anchored on each end by flowering planting beds at the edge of the public sidewalk. Resting knolls, hammock sites, and other passive seating areas are also provided to support a passive program. Security lighting is added.

Voyageur Park

Large Urban Park — 21.74 Acres

Voyageur Park is located at the western terminus of Williams Street between the Fox River and downtown. This park offers a wide range of recreational opportunities including restrooms, docks, fishing areas, a shade pavilion, a new playground with poured-in-place surface, and numerous paved trails with benches. Several surface parking lots are also present. The park contains numerous trees throughout except for a large open grass field (Approximately 1 acre) where the community's largest annual festival, "Celebrate De Pere", is held every Memorial Day weekend. The park is also used for a monthly summer Beer Garden hosted by De Pere Parks, Recreation, and Forestry.

Groundbreaking for the new Nelson Family Pavilion occurred in 2023, with expected completion in June 2024. The Nelson Family Pavilion is a new performance venue located in the park and provides an opportunity to increase programming at Voyageur Park. The facility will include an interior space that can accommodate 250 people for private gatherings. The garage doors open to a stunning patio situated on a hill overlooking the one-acre open space where the Beer Garden is held. Parkland Dedication Requirement Comparison

Community	Parcel Land Amount	Fee Determination	Fee Use by Municipality	Land Requirements	Additional Notes
De Pere	4.4% of total nonpublic residential property developed in residential zoned districts.	Single Family: $300 Two Family: $600 Multi-family: $150/bedroom	Open space acquisition or the preparation of park and open space plans, including a master plan of development.	Land dedications shall be compatible with the comprehensive plan for the development of the community.	
Ashwaubenon	1 dedicated acre per 35 acres of development.	Based on full market value of the land to be dedicated	Funds for the acquisition and development of public sites, recreation areas, open spaces, and greenways.	Areas that match descriptions in Village Comprehensive Plan or that hold significant scenic or historic qualities.	If the value of the dedicated land is valued at less than the public site fee the sub divider is to pay the difference. If the site fee is less than the lands value the village has the option to buy the land for three years, if not purchased in that time period the land is released to the owner.
Marshfield	1 acre per 45 potential dwelling units	Per dwelling size: 1 - 2 family-$200 Multifamily-$150/dwelling	For developing adequate parks, playgrounds, trails, recreation, and open spaces	Areas less than one acre must be located in an expandable area. Must have proper drainage, surface contour, and seeding.	Mixed use developments that include green spaces may not be required to dedicate as much land or received a prorated fee.
Menomonie	10% of the gross area of all property proposed for subdivision	Determined by # of families per lot. 1-4 families: $400, 5:$500, 6:$600, 7:$700, 8:$800	For the purchase, development, improvement/maintenance of parks, open spaces, or recreational sites.	Area>2 acres, 80' of street frontage, no other dimension less than 200'. Utility installation and seeding required.	Combination of land dedication and fee payment allowed
Stevens Point	Percent of gross area of sub development. E.G. 5 acres: 11% land dedication 8 acres: 13%.	Per dwelling size: Single family-$300/unit Duplex- $250/unit Multiple family-$200/unit Mobile home-$200/lot	For the purchase, development, improvement/maintenance of parks, open spaces, or recreational sites.	Land dedication must be compatible with the Stevens Point Comprehensive Outdoor Recreation Plan as determined by the city.	Location and adaptability of the potentially dedicated land for recreation purposes are taken into account by the city before acceptance as dedicated park land.
Watertown	A size adequate to meet the needs created by the subdivision	$506 for each institutional residential housing unit and $1,264 each for all other dwelling unit types, or value of land to be dedicated	To provide public parks, playgrounds, open spaces and athletic fields, and any supporting recreation facilities. May include costs of land acquisition and debt.	Land shall be conveniently located with at least 100' of road frontage and reasonably adaptable for the intended park and recreation uses.	All subdivisions are required to provide linkages from on location parks to public right of ways. Combination of land dedication and fee payment allowed.
